The organisms go through certain genetic changes due to mutation and other significant reasons and evolve over successive generations.

Important Biology Questions and Answers for Chapter-7 ...

It is important to point out that evolutionary biologists do not use the "Primordial Soup" hypothesis of the origin of life as a definite answer as to how life started on Earth. In fact, most, if not all, current textbooks do point out that the way they simulated the atmosphere of early Earth was probably incorrect.

Questions to Ask Your Biology Teacher About Evolution

1. How can one species "turn into" another? 2. How can evolution produce complex organs like the eye? 3. Does evolution stop once a species has become a species? 4. Is evolution happening now?

Evolution: Frequently Asked Questions - PBS

Answer: Evolution. Evolution is the sequence of gradual changes which take place in the primitive organisms over

millions of years in which new species are produced. Evolution cannot be equated with progress. More and more complex body designs have emerged and evolved over time, but this does not mean that the older designs are inefficient.
