If more solute is added and it does not dissolve, then the original solution was saturated. If the added solute dissolves, then the original solution was unsaturated. A solution that has been allowed to reach equilibrium but which has extra undissolved solute at the bottom of the container must be saturated.

Saturated and Unsaturated Solutions | Chemistry for Non-Majors

An unsaturated solution is one in which a little amount of solute has been added to the solvent. A solution is said to be saturated when a solute is not able to dissolve in the solvent. A supersaturated solution, on the other hand, is when the excess of solute is dissolved in the solvent as a result of changes in temperature, pressure or other conditions.

16.3: Saturated and Unsaturated Solutions - Chemistry ...

An unsaturated solution contains less than the maximum soluble material, while a saturated solution contains all of the material that it is able to dissolve in its current state, with excess material remaining undissolved. A supersaturated solution holds more of the solvent than it would be able to under normal circumstances.

What Is the Difference Between Unsaturated, Saturated and ...

A saturated solution is a solution that contains the maximum amount of solute that can be dissolved under the condition at which the solution exists. In chemistry, after studying solutions and properties of the solution, one can understand that a solution can reach a status of saturation.

What is a Saturated Solution - Preparation, Types & Examples

A saturated solution is a solution where the addition of more compound would not dissolve in the solution (e.g. 359 g NaCl/liter of solution at 25 degrees Celsius). An unsaturated solution has the capacity to dissolve more of the compound (e.g. 36 g NaCl
