Research Methods For Business Students, 5/e *Pearson Education India*

Research Methods for Business Students

"This accessible and clearly written textbook provides a comprehensive and in-depth treatment of philosophical, methodological and ethical aspects of conducting business and management research. Illustrative case studies drawing on published research studies are used throughout and readers are given multiple opportunities to consolidate their learning through review and discussion questions, quizzes, and other exercises. At the end of each chapter a case study takes the reader through the realities and practicalities of applying the knowledge to a specific student research project. This will be an invaluable guide for all students seeking to understand and undertake business and management research." Professor Natasha Mauthner, Newcastle University With over 400,000 copies sold, Research Methods for Business Students, is the definitive and market-leading textbook for Business and Management students conducting a research-led project or dissertation. The fully revised 8th edition answers key questions such as: How do I choose my topic and design the research? Why is research philosophy relevant to my research? How do I collect and analyse my data? When and what do I need to write? With the 8th edition you will discover: ü Fully updated chapters incorporating visual methods throughout, detailed insights on drafting the critical literature review, the latest EU data protection regulations, using audio recordings and visual images in observation research, collecting data using diaries, the use of online survey tools, and preparing and presenting an academic poster ü New cases using up-to-date scenarios at the end of each chapter ü Boxed examples throughout of research methods in the news, from student research and in published management research ü A glossary of clear definitions of over 700 research-related terms ü Practical guidance and opportunities for checking your learning and self-reflection to enable you to progress your own research ü Detailed chapters on choosing your topic, critically reviewing the literature, understanding philosophies, research design, access and ethics, secondary data, data collection methods and analysis techniques and writing about and presenting your research ü Teach yourself guides to research software available at www.pearsoned.co.uk/saunders with practice data sets About the authors Mark NK Saunders is Professor of Business Research Methods and Director of Postgraduate Research Programmes at Birmingham Business School, University of Birmingham. Philip Lewis was a Principal Lecturer and Adrian Thornhill was a Head of Department, both at the University of Gloucestershire.

Research Methods for Business Students *Prentice Hall*

Revised edition of Research methods for business students, 2012.

Research Methods for Business and Social Science Students *SAGE Publications India*

Research Methods for Business and Social Science Students aims to present a clear discussion of the research methods employed in various disciplines related to our daily life problems. The theoretical basis of research methods is explained clearly and succinctly. Collecting data is a key part of the book and this includes both qualitative and quantitative methods of data collection, along with the advantages and disadvantages of each method. The book also describes in clear terms how students can analyse data, interpret results and link these to the literature review and hence their own contribution. It sets out a range of fundamental ideas in research methods, such as deductivism and inductivism, and explains why methodology is not the same as method. In this second edition every chapter has been re-written to be more readable and also to include more examples. The authors have also added a real student research proposal and a multiple-choice test with answers for the readers to test their own understanding of the ideas in the book. The book has been designed to illustrate research tools in a clear and accessible manner through chapters on such topics as formulating research, research design, data analysis and writing up the research results.

Research Methods For Business

A Skill Building Approach *John Wiley & Sons*

Research Methods For Business, 8th Edition explains the principles and practices of using a systematic, organized method for solving problematic issues in business organizations. Designed to help students view research from the perspective of management, this popular textbook guides students through the entire business research process. Organized into six main themes—Introduction, Defining the Management and the Research Problem, Theory, Collecting Information, Drawing Conclusions, and Writing and Presenting the Research Report—the text enables students to develop the skills and knowledge required to successfully create, conduct, and analyze a research project. Now in its eighth edition, this popular textbook has been thoroughly updated to incorporate substantial new and expanded content, and reflect current research methods and practices. The text uses a unique blended learning approach, allowing instructors the flexibility to custom-tailor their courses to fit their specific needs. This innovative approach combines the face-to-face classroom methods of the instructor with internet-based activities that enable students to study what they want, when they want, at their own pace.

Conducting Case Study Research for Business and Management Students *SAGE*

Part of SAGE's Mastering Business Research Methods series, conceived and edited by Bill Lee, Mark N. K. Saunders and Vadake K. Narayanan, the series is designed to support business and management students with their research-based dissertations by providing in-depth and practical guidance on using a chosen method of data collection or analysis. The books are written in a concise and accessible way, and contain a range of features, including checklists and a glossary, designed to support self-guided research. In Case Study Research, Bill Lee and Mark Saunders describe the properties of case study designs in organizational research, exploring the uses, advantages and limitations of case research. They also demonstrate the flexibility that case designs offer, and

challenges the myths surrounding this approach. Ideal for Business and Management students reading for a Master's degree, each book in the series may also serve as reference books for doctoral students and faculty members interested in the method. Watch the editors introduce the Mastering Business Research Methods series and tell you more about the first three books.

Doing Research in Business and Management

La 4e de couverture indique : "If you need any help with your research project or dissertation then this fully revised and updated 2nd edition is ideal for you. Doing Research in Business and Management brings research methods to life, covering critical literature review projects, projects using existing data, and those projects where you collect your own data. It explains how to write your research proposal and complete your entire research project. The concise and easy-to-read style combined with clear tables and diagrams makes it highly accessible. 'Definition' boxes explain key terms and 'Research in practice' boxes show how research is used in real life, making this the book you need to successfully complete your project. New to the 2nd edition: latest sources of online secondary data, extended discussion of research philosophies and theory development, using observation, and how to reference. Don't forget to visit www.pearsoned.co.uk/saunders for online tutorials on research software, such as SPSS, and where you can search the Internet more efficiently and effectively with our Smarter Online Searching Guide!"

Business Research Methods *Bookboon*

Research Methods for Graduate Business and Social Science Students *SAGE Publications India*

Research Methods for Graduate Business and Social Science Students is a fundamental and easy guide to studying research methods. In addition to the general concepts relating to research methods, broad research issues and theoretical concepts critical to research are discussed. The book is written in a highly reader-friendly manner and contains plenty of examples and helpful practical exercises at the end of each chapter to reinforce and enjoy learning. Divided into 16 chapters, the authors aim to clearly and concisely explain the basics of quantitative and qualitative analysis and research to students, including: - Research ethics - Formulation and process of research - Literature analysis and critical reading - How to plan and implement a research project - Data collection, survey research and data management - Practical research techniques - Elementary and advanced statistical analyses - Assessment, reliability and validity of research work - Guidelines on research writing and structures of dissertation

Qualitative Methods in Business Research *SAGE*

`Comprehensive, current and compelling, a winning combination for any research student or practitioner interested in increasing his/her knowledge about qualitative methods as they apply to business research' - The Qualitative Report Covering all the major qualitative approaches in business studies (including case study research, ethnography, narrative inquiry, discourse analysis, grounded theory and action research), this practical how-to guide shows how qualitative methods are used

within management, marketing, organizational studies and accounting. Within each approach, the authors consider crucial issues such as framing the research, generating research questions, getting access, collecting empirical materials, reporting the results and evaluating the research. Original case studies drawn from around the world are included throughout to demonstrate the practical applications of the methods discussed.

Management and Business Research *SAGE*

Now in its Fifth Edition, this much-loved text offers theoretical and philosophical depth as well as insights into practice. The text covers the entire research process in an accessible way and provides critical, thoughtful treatment of important issues like ethics and politics, making it an invaluable companion for any business and management student. New to the Fifth Edition: Expanded to include examples from across business and management including Marketing, International Business and Psychology Up-to-date, international examples and cases from a range of countries Introductory chapter looks at writing proposals in detail Chapter on the literature review now includes how to critically review Move towards new technologies and social media including discussion of wikis and cloud sourcing Improved structure and flow, with three chapters on qualitative methods and three on quantitative methods Additional practical exercises which are linked to key research tasks throughout The companion website (<https://edge.sagepub.com/easterbysmith>) offers a wealth of resources for both lecturers and students including, for lecturers, an instructor's manual and PowerPoint slides and, for students, author podcasts, journal articles, web links, MCQs, datasets and a glossary.

Business Research

A Guide to Planning, Conducting, and Reporting Your Study *SAGE Publications*

A concise, simplified approach to the research process in business and management, guiding students step-by-step through their research project, from exploring questions and problems, to designing the research, and lastly, writing the results. Chapters include a design matrix and three sets of questions by research objective to help identify the designs that are appropriate for a project and why. There are also seven road marker activities -exploring, planning, creating, conducting, collecting, analyzing, and writing - directing students from one milestone to the next. Key features include: Statistical Decision Trees enabling students to bypass the typical statistics chapters and select the appropriate analysis based on prior learning Global narrative highlighting a wide spectrum of business research challenges. An APA style how-to guide with over 26 exhibits that includes writing examples using permissions for articles and a 2016 thesis. Qualitative research and mixed designs. Real world case studies blending business research within the context of successful organizations. The book is supported by online resources for instructors and students, including: PowerPoint slides, an instructor's manual, author selected videos, cases and data sets from SAGE SRM. Suitable for Business and management students undertaking a research project or research paper.

Template Analysis for Business and Management Students SAGE

In Template Analysis, Nigel King and Joanna Brookes guide you through the origins of template analysis and its place in qualitative research, its basic components, and the main strengths and limitations of this method. Practical case studies and examples from published research then guide you through how to use it in your own research project. Ideal for Business and Management students reading for a Master's degree, each book in the series may also serve as a reference book for doctoral students and faculty members interested in the method. Part of SAGE's Mastering Business Research Methods, conceived and edited by Bill Lee, Mark N. K. Saunders and Vade K. Narayanan and designed to support researchers by providing in-depth and practical guidance on using a chosen method of data collection or analysis. Watch the editors introduce the Mastering Business Research Methods series.

Designing and Managing a Research Project

A Business Student's Guide SAGE

Designing and Managing a Research Project is a concise, easy to read text designed to guide business students through the various aspects of designing and managing research projects. The focus is on research projects that have a solid academic basis, although some implications for more applied projects are also highlighted. It is divided into three main sections, "Laying the Foundations", "Undertaking the Research", and "Communicating the Results", which present a logical flow for the research project. A unique aspect of the book is the inclusion of particular chapters on topics like supervision, group work and ethics, and the focus of the discussion of data analysis (qualitative and quantitative). The authors have applied their years of past experience in supervising student projects, when writing this book to provide some actual examples of problems and practical guidelines.

Analysing Quantitative Survey Data for Business and Management Students SAGE

In Analysing Quantitative Survey Data, Jeremy Dawson introduces you to the key elements of analysing quantitative survey data using classical test theory, the measurement theory that underlies the techniques described in the book. The methodological assumptions, basic components and strengths and limitations of this analysis are explained and with the help of illustrative examples, you are guided through how to conduct the key procedures involved, including reliability analysis, exploratory and confirmatory factor analysis. Ideal for Business and Management students reading for a Master's degree, each book in the series may also serve as reference books for doctoral students and faculty members interested in the method. Part of SAGE's Mastering Business Research Methods Series, conceived and edited by Bill Lee, Mark N. K. Saunders and Vade K. Narayanan and designed to support researchers by providing in-depth and practical guidance on using a chosen method of data collection or analysis. Watch the editors introduce the Mastering Business Research Methods series

Business Research Methods

A Practical Approach Kogan Page Publishers

Organizations need research, and managers have to be able to commission, judge and use others' research as well as conduct research themselves to inform business decisions. Business Research Methods helps you understand the challenges of carrying out worthwhile research into significant issues and develop a wide range of research-related professional skills. Guiding you through the process of selecting, carrying out and reporting on a successful research project, it breaks down the research process, from exploring the literature and crafting a research proposal to practical research management and addressing the transferable skills of project management and communication. Business Research Methods places research firmly in the real world, exploring why research is done and how to ensure that projects are meaningful for organizations. Examples and case studies, including examples of students' projects, give learners with little or no work experience a meaningful context in which to relate their own projects. Online supporting resources for lecturers include an instructor's manual with additional activities and supporting handouts, lecture slides and figures and tables from the text. Resources for students include web links, templates, quizzes, activities, examples of practice and sample questionnaire results for students.

Conducting Necessary Condition Analysis for Business and Management Students SAGE

Part of SAGE's Mastering Business Research Methods series, conceived and edited by Bill Lee, Mark N. K. Saunders and Vade K. Narayanan and designed to support students by providing in-depth and practical guidance on using a chosen method of data collection or analysis. Necessary Condition Analysis (NCA) is an emerging method of data analysis, based on the idea that research factors can be necessary for an outcome: if the condition is not there, then the result will not occur. These necessary conditions are everywhere, and NCA is an intuitive and straightforward means of finding and testing data, either as a standalone tool or as a complement to other research methods. This book is an invaluable guide to using NCA effectively in business and management dissertations, and offers practical guidance and insight into how to successfully transcribe and analyse data using the NCA approach in research projects. Jan Dul is Professor of Technology and Human Factors at Rotterdam School of Management, Erasmus University, The Netherlands.

Analysing Quantitative Data for Business and Management Students SAGE

In Analysing Quantitative Data, Charles A. Scherbaum and Kristen M. Shockley guide the reader through Understanding Quantitative Data Analysis, Basic Components of Quantitative Data Analysis, Conducting Quantitative Data Analysis, Examples of Quantitative Data Analysis and Conclusions. An appendix contains Excel Formulas. Ideal for Business and Management students reading for a Master's degree, each book in the series may also serve as reference books for doctoral students and faculty members interested in the method. Part of SAGE's Mastering Business Research Methods Series, conceived and edited by Bill Lee, Mark N. K. Saunders and Vade K. Narayanan and designed to support researchers by providing in-depth and practical guidance on using a chosen method of data collection or analysis. Watch the editors introduce the Mastering Business Research Methods series

The Essentials of Business Research Methods *Routledge*

Increasingly, managers must make decisions based on almost unlimited information. How can they navigate and organize this vast amount of data? *Essentials of Business Research Methods* provides research techniques for people who aren't data analysts. The authors offer a straightforward, hands-on approach to the vital managerial process of gathering and using data to make clear business decisions. They include critical topics, such as the increasing role of online research, ethical issues, data mining, customer relationship management, and how to conduct information-gathering activities more effectively in a rapidly changing business environment. This is the only text that includes a chapter on qualitative data analysis, and the coverage of quantitative data analysis is more extensive, and much easier to understand than in other texts. The book features a realistic continuing case throughout that enables students to see how business research information is used in the real world. It includes applied research examples in all chapters, as well as ethical dilemma mini cases, and exercises.

Value Pack**Research Methods for Business Students with Researching and Writing a Dissertation for Business Students** *Financial Times/Prentice Hall***Doing Research in Business and Management****an essential guide to planning your project** *Pearson Higher Ed*

Doing Research in Business and Management brings the theory and techniques of research methods to life and covers all of the areas of research, from a review of secondary data or literature, or writing a research proposal, to completing an entire research project. How to Write Dissertations & Project Reports

Students need more help than ever before in selecting their dissertation or project topic and ensuring this major project gets the best marks. This book provides crucial support that will help organise their thinking and get them on the road to success.

Organizational Research Methods**A Guide for Students and Researchers** *SAGE*

'This text provides a timely and comprehensive introduction to major research methods in the Organizational sciences. It will be a boon to all students conducting their projects in this area, and may well become a standard reference for staff teaching research methods to undergraduate and postgraduate students of business studies or organizational behaviour' - Professor Neil Anderson, Goldsmiths College, University of London 'This reasonably priced text would provide an invaluable

starting point for those considering undertaking research in organisational settings' - Paula Roberts, Nurse Researcher This book provides the reader with clear pointers for how to conduct organizational research appropriately, through planning and making informed and systematic research decisions, to understanding the ethical implications of applied organizational research, to implementing, reporting and presenting the findings to the highest possible standards. It provides an overview of a wide variety of research strategies, methods of data collection (both qualitative and quantitative) and analysis in a volume accessible to both an undergraduate, postgraduate and practitioner readership alike. *Organizational Research Methods* also represents a useful aid to the report writing task, indicating ways in which the project material can be most effectively organised for academic and feedback purposes, and by drawing upon real-life organizational contexts and examples to help the reader understand the core issues. Finally, the book offers a clear, manageable procedure for preparing a presentation to an academic or an organizational audience. Providing practical guidance on all elements of the research process, this book will be essential reading to all undergraduate and postgraduate students, as well as researchers, in psychology, organizational studies and management disciplines.

Research Methods for Business & Management**A Guide to Writing Your Dissertation** *Goodfellow Publishers Ltd*

This updated and revised edition offers a comprehensive overview of key research methods and the main choices available when undertaking research in business and management. New to this edition is a comprehensive, practical guide on how to write your dissertation - invaluable to all. It is a clear, concise and practical guide containing wealth of outstanding examples for each method covered. Central to this edition is the 'methods map' (chapter 4), which sets out a logical process for researchers to articulate their position in relation to five key aspects of their research philosophy. In addition, the editors have developed a free app to accompany the book and this enables novice researchers to quickly develop a comprehensive justification of their particular research design in an interactive way. Taking you through the entire life cycle of a dissertation, the text covers everything from the purposes of research through to chapters on gathering primary and secondary data; using literature; quantitative and qualitative research; managing your research; using data and research ethics. Individual chapters are allied to a powerful critical commentary showing how some of the world's leading scholars have used particular methods in their own research. Carefully constructed to achieve the greatest clarity for the student the text gives the reader: * In-text exercises * End of chapter' review questions with solutions* Exemplar papers identified and discussed for each of the main methods *Directed further reading for developing understanding in key areas It is an essential learning aid for upper level undergraduates and postgraduates across a wide range of business and management courses and it comes with a range of supported learning materials including tutorials, lecture slides and tutor notes. Kevin O'Gorman is Professor of Management and Business History and Head of Business Management in the School of Languages and Management in Heriot-Watt University, Edinburgh. He trained in Glasgow, Salamanca and Rome as a philosopher, theologian and historian. His research interests have a dual focus: Origins, history and cultural practices of

hospitality, and philosophical, ethical and cultural underpinnings of contemporary management practices. Using a wide range of methodological approaches he has published over 80 journal articles, books, chapters, and conference papers in business and management studies. Robert MacIntosh is Professor of Strategy and Head of the School of Management and Languages at Heriot-Watt University. He trained as an engineer and has worked at the Universities of Glasgow and Strathclyde. His research on the ways in which top teams develop strategy and on organizational change has been published in a wide range of outlets. He has a long-standing interest in research methods for business and management studies and has published on the relevance of management research using methods that include ethnography and action research. He has consulted extensively with public and private sector organizations and sits on the board of the charity Turning Point Scotland.

Business Research Methods *Oxford University Press, USA*

An adaptation of 'Social Research Methods' by Alan Bryman, this volume provides a comprehensive introduction to the area of business research methods. It gives students an assessment of the contexts within which different methods may be used and how they should be implemented.

Research Methods in Education *SAGE Publications*

Research Methods in Education introduces research methods as an integrated set of techniques for investigating questions about the educational world. This lively, innovative text helps students connect technique and substance, appreciate the value of both qualitative and quantitative methodologies, and make ethical research decisions. It weaves actual research "stories" into the presentation of research topics, and it emphasizes validity, authenticity, and practical significance as overarching research goals. The text is divided into three sections: Foundations of Research (five chapters), Research Design and Data Collection (seven chapters), and Analyzing and Reporting Data (three chapters). This tripartite conceptual framework honors traditional quantitative approaches while reflecting the growing popularity of qualitative studies, mixed method designs, and school-based techniques. This approach provides a comprehensive, conceptually unified, and well-written introduction to the exciting but complex field of educational research.

Business Research Methods for Chinese Students

A Practical Guide to Your Research Project *SAGE*

Written by Chinese authors who having both successfully completed Masters degrees and PhDs and become lecturers at UK universities, are equipped to provide Chinese students with straightforward guidance to help overcome the cultural and language difficulties they are confronted with, and to support them in their undertaking of the research methods section of their dissertations. The book comprehensively covers both the theory and practice and includes a number of features to support learning including: Chinese translations of key concepts and definitions Tips about how to use

different methods in the Chinese context Clear definitions of key terms Short illustrative examples A list of useful resources about Chinese research The book also features examples of Chinese research from the authors' own work and from top journals to illustrate how the methods can be applied in the Chinese context. Suitable reading for undergraduate and postgraduate students across all business and management disciplines.

Conducting Research Interviews for Business and Management Students SAGE

In *Conducting Research Interviews*, Catherine Cassell guides you through conceptualizing the interview, preparing for the research interview, conducting the interview, examples, conclusions and next steps. Ideal for Business and Management students reading for a Master's degree, each book in the series may also serve as reference books for doctoral students and faculty members interested in the method. Part of SAGE's Mastering Business Research Methods Series, conceived and edited by Bill Lee, Mark N. K. Saunders and Vadake K. Narayanan and designed to support researchers by providing in-depth and practical guidance on using a chosen method of data collection or analysis. Watch the editors introduce the Mastering Business Research Methods series.

Management Research Methods John Wiley & Sons

This textbook shows business students how to conduct reliable research and how to argue the soundness of their research approach. *Guide to Management Research Methods* is a practical introduction to research methods and also gives students the ability to conduct reliable research on the basis of empirical field data. It Helps in deciding which methods are most appropriate and is filled with real-life examples, cases and practical guidelines. Planning The Research Project Conducting The Research Project Reporting The Research Project

Conducting Focus Groups for Business and Management Students SAGE

In *Conducting Focus Groups*, Caroline J. Oates and Panayiota J. Alevizou explain what is involved in conducting focus groups, outlining their main features, use in research, their design and the kind of rich, qualitative data they facilitate. Ideal for Business and Management students reading for a Master's degree, each book in the series may also serve as reference books for doctoral students and faculty members interested in the method. Part of SAGE's Mastering Business Research Methods, conceived and edited by Bill Lee, Mark N. K. Saunders and Vadake K. Narayanan and designed to support researchers by providing in-depth and practical guidance on using a chosen method of data collection or analysis. Methods in Sustainability Science

Assessment, Prioritization, Improvement, Design and Optimization Elsevier

Methods in Sustainability Science: Assessment, Prioritization, Improvement, Design and Optimization presents cutting edge, detailed methodologies needed to create sustainable growth in any field or industry, including life cycle assessments, building design, and energy systems. The book utilized a

systematic structured approach to each of the methodologies described in an interdisciplinary way to ensure the methodologies are applicable in the real world, including case studies to demonstrate the methods. The chapters are written by a global team of authors in a variety of sustainability related fields. *Methods in Sustainability Science: Assessment, Prioritization, Improvement, Design and Optimization* will provide academics, researchers and practitioners in sustainability, especially environmental science and environmental engineering, with the most recent methodologies needed to maintain a sustainable future. It is also a necessary read for postgraduates in sustainability, as well as academics and researchers in energy and chemical engineering who need to ensure their industrial methodologies are sustainable. Provides a comprehensive overview of the most recent methodologies in sustainability assessment, prioritization, improvement, design and optimization Sections are organized in a systematic and logical way to clearly present the most recent methodologies for sustainability and the chapters utilize an interdisciplinary approach that covers all considerations of sustainability Includes detailed case studies demonstrating the efficacies of the described methods

The Routledge Companion to Mindfulness at Work Routledge

Given the ever-growing interest in the benefits of mindfulness to organizations and the individuals who work in them, this Companion is a comprehensive primary reference work for mindfulness (including creativity and flow) in the workplace, including business, healthcare, and educational settings. Research shows that mindfulness boosts creativity through greater insight, receptivity, and balance, and increases energy and a sense of wellbeing. This Companion traces the genesis and growth of this burgeoning field, tracks its application to the workplace, and suggests trends and future directions. With contributions from leading scholars and practitioners in business, leadership, psychology, healthcare, education, and other related fields, *The Routledge Companion to Mindfulness at Work* is an extensive reference work which will be a vital resource to the fields of management and organizational studies, human resource management, psychology, spirituality, cultural anthropology, and sociology. Each chapter will present a listing of key topics, a case or situation that illustrates the application of the themes, workplace lessons, and reflection questions.

Qualitative Research Using Social Media Routledge

Do you want to study influencers? Opinions and comments on a set of posts? Look at collections of photos or videos on Instagram? *Qualitative Research Using Social Media* guides the reader in what different kinds of qualitative research can be applied to social media data. It introduces students, as well as those who are new to the field, to developing and carrying out concrete research projects. The book takes the reader through the stages of choosing data, formulating a research question, and choosing and applying method(s). Written in a clear and accessible manner with current social media examples throughout, the book provides a step-by-step overview of a range of qualitative methods. These are presented in clear ways to show how to analyze many different types of social media content, including language and visual content such as memes, gifs, photographs, and film clips. Methods examined include critical discourse analysis, content analysis, multimodal analysis, ethnography, and focus groups. Most importantly, the chapters and examples show how to ask the

kinds of questions that are relevant for us at this present point in our societies, where social media is highly integrated into how we live. Social media is used for political communication, social activism, as well as commercial activities and mundane everyday things, and it can transform how all these are accomplished and even what they mean. Drawing on examples from Twitter, Instagram, YouTube, TikTok, Facebook, Snapchat, Reddit, Weibo, and others, this book will be suitable for undergraduate students studying social media research courses in media and communications, as well as other humanities such as linguistics and social science-based degrees.

Business Research Methods *Irwin/McGraw-Hill*

Cooper and Schindler's Business Research Methods offers students and instructors thorough coverage of business research topics backed by solid theory. The authors are successful marketing research consultants and that is evident in the rich and realistic case studies found in the text.

Managerial decision making is the underlying theme, topics and applications are presented and organized in a manner that allow students to thoroughly understand business research topics and functions. Consequently, the structure of the text encourages and supports completion of an in-depth business research project during the semester.

Research Methods and Statistics for Business *Waveland PressInc*

Summary: "Research Methods and Statistics for Business ... includes 30 research designs and 30 bivariate and multivariate statistical tests, taking students through a step-by-step process to select the appropriate statistical method. The author's approach effectively integrates research and statistics, beginning with research methodology and then guiding students through the process of conducting their own statistical research, from the initial process of selecting the research topic through the finished research paper."--Waveland website, viewed 10th June, 2011.
