Volume 10 in the Handbook of Green Chemistry series provides useful and practical tools, databases, and laboratory approaches to support chemists working in both academia and industry in achieving their green chemistry goals. Among many other helpful techniques covered, the authors offer prediction software, life cycle assessment methodology, and screening tools.

Tools for Green Chemistry, Volume 10 | Wiley

Green Chemistry provides a unique forum for the publication of innovative research on the development of alternative green and sustainable technologies. The scope of Green Chemistry is based on, but not limited to, the definition proposed by Anastas and Warner (Green Chemistry: Theory and Practice, P T Anastas and J C Warner, Oxford University Press, Oxford, 1998).

Green Chemistry

An additional opportunity for green chemistry to enter the paints and coatings marketplace is through the production of bio-based monomers that are used to make polymers. Alkyd resins, typically containing a significant level of bio-based content, have, of course, been used for several centuries, although their imminent demise has been predicted for the past six decades.
