The Science of The X-Files : The Truth by Michael White

X-ray astronomy is a relatively new science. It was pioneered in the 1960s and 70s by American astronomers with a series of rocket flights and orbiting X-ray satellites. The astounding discoveries made by X-ray astronomers — such as neutron stars and black holes in binary systems, and hot gas filling the space within clusters of galaxies — have revolutionized our view of the Universe.

The COVID-19 syndemic is entering its most dangerous phase. There is a mounting breakdown of trust. Not only between politicians and the public. But also among politicians and publics with science and scientists. This breach of faith with science is far more threatening. For the public is slowly turning against those who have sought to guide the political response to COVID-19.
