Introduction to Automotive Electrical and Electronic Systems

A car's electrical system is a bit like your body's circulatory system in that it has a battery (the heart) from which electricity (blood) flows along the wires (the blood vessels) to the parts that require it, before returning to the battery. In fact, the analogy is closer still when you consider that like blood, the electrical current flows in only one direction - from the battery, to the part being powered and back to the battery through the car's metal body.
