Performance and design characteristics of airlift pumps ...

An airlift pump is a pump that has low suction and moderate discharge of liquid and entrained solids. The pump injects

compressed air at the bottom of the discharge pipe which is immersed in the liquid. The compressed air mixes with the liquid causing the air-water mixture to be less dense than the rest of the liquid around it and therefore is displaced upwards through the discharge pipe by the surrounding liquid of higher density. Solids may be entrained in the flow and if small enough to fit t
