Our subsea boosting technology enables the customer to optimize oil production from one of the world's deepest subsea reservoirs," said Mike Garding, president, OneSubsea, Schlumberger. With a longstanding experience of 25 years in delivering subsea solutions,

OneSubsea designs advanced systems to enhance oil production rate from subsea fields.

Facilitating Oil Production with Subsea Boosting System

Subsea processing could increase field reserves from 20 percent to 30 percent. In the next 20 years, market growth will average 14 percent annually with four main applications for subsea processing: Boosting - increasing oil recovery through full well stream boosting
Seawater injection - increasing oil recovery through water flooding
