Seafarers' assessment in the implementation of International Safety Management (ISM) code

This study examines the overall effectivity in implementing and communicating the ISM Code to its seafarers through its merchant vessels. Survey questionnaires were used to gather the data while the technique of stratified random sampling using Slovin's formula was used to choose the respondents. The respondents of the research were stratified based on the manning agent they are currently employed. The researcher employed the use of Runs test or Wald Wolfowitz, a non-parametric statistical test in checking the hypothesis. The researcher formulated survey questions which were focused mainly on the views of the seafarers and their understanding of the ISM Code in implementing the ISM Code's purpose. The findings showed that seafarers are knowledgeable in ISM Code and that compliance to it is very well implemented onboard. Moreover, the results show that the merchant vessels comply with the regulations set forth in the ISM Code through the trainings given to the seafarers, emergency drills and documentation, audit, and evaluation of prevention activities. However, the results of the audits which could greatly help improve the compliance and awareness of the seafarers are not often discussed nor informed to them. The result of the study

helps structure a good grounding on how the ISM Code safeguards the life of the passengers. It also instills awareness to the society on the benefits of the shipping industry to the environment and its personnel. Furthermore, the result abets in determining whether the implementation process and job knowledge of the personnel on board is acceptable to the standards of the ISM Code.

International Safety Management Code was adopted by the International Maritime Organization in 1998 and serves to provide an international standard for the safe management and operation of ships and for pollution prevention. Surveys conducted at international maritime universities and Maine Maritime Academy showed that graduates lack knowledge of basic ISM Code components, and globally, ISM Code is not an integral component of the undergraduate curriculum. This provides an opportunity for Maine Maritime Academy to develop a course of ISM Code for undergraduates and thus enhance its brand and reinforce its image as a globally recognized leader in maritime education.--From executive summary.
