Abstract: Detection and parameter estimation of a transient signal in noise is a problem of many applications. It is characterized by the fact that some of the measurements consist of noise only. Modern statistical signal processing techniques are applied on a discrete version of the received data and are implemented by digital signal processing (DSP).

For the joint detection and parameter

estimation with the unknown and random number of signals, ideal observers are formulated by optimizing the performance metrics of FROC-type curves , , . The optimization model is proposed by maximizing the ordinate of the FROC (or AFROC) curve subject to the constraint on the abscissa of corresponding curve.

In this paper, we consider structure detection and parameter estimation of the nonlinear auto-regressive with exogenous inputs (NARX) model, using the EM (expectation-maximisation) algorithm. The parameter estimation step uses particle smoothing to obtain the necessary expectations in the E-step

and the parameters are then estimated in closed form in the M-step.

Target detection and parameter estimation for MIMO radar systems. Abstract: We investigate several target detection and parameter estimation techniques for a multiple-input multiple-output (MIMO) radar system. By transmitting independent waveforms via different antennas, the echoes due to targets at different locations are linearly independent of each other, which allows the direct application of many data-dependent beamforming techniques to achieve high resolution and excellent interference ...

Estimation theory is a branch of

statistics that deals with estimating the values of parameters based on measured empirical data that has a random component. The parameters describe an underlying physical setting in such a way that their value affects the distribution of the measured data. An estimator attempts to approximate the unknown parameters using the measurements. In estimation theory, two approaches are generally considered. The probabilistic approach (described in this article) assumes
