1.1 Material flow analysis methodology has advanced but research tools have not kept up with the development. Material flow analysis (MFA) is the study of stocks and flows of materials in systems (Baccini & Brunner, 1991; Brunner & Rechberger, 2016). It is a core industrial ecology method, as the accounting of material stocks and flows in a system definition represents the basis for process inventory modeling, urban metabolism studies, physical input-output tables, and material flow cost ...
