Radio Frequency And Microwave Electronics

Radio-frequency (RF) engineering is a subset of electronic engineering involving the application of transmission line, waveguide, antenna and electromagnetic field principles to the design and application of devices that produce or utilize signals within the radio band, the frequency range of about 20 kHz up to 300 GHz.. It is incorporated into almost everything that transmits or receives a ...

Filters are used in many areas of electronics. One of the main areas where they are used is within the radio frequency or RF domain. RF filters are used to remove or accept signals that fall in certain areas of the radio spectrum. There are many different instances where they can be used - the list of applications is almost infinite.
