Prentice Hall Science Explorer: Inside Earth

Interactive Textbook 6-Year Online Access

Blind Date *Open Road + Grove/Atlantic*

A spectacular and erotically charged psychological novel from the acclaimed author of *Being There* and *The Painted Bird*. George Levanter is an idea man, a small investor, an international playboy, and a ruthless dealmaker whose life is delivered in a series of scorching encounters, each more incredible than the last. From Moscow to Paris, from a Manhattan skyscraper to a California mass murder, *Blind Date* is a dizzying vision of life among the beautiful people and the thrill-seekers that shows Jerzy Kosinski at the height of his power. "Kosinski's vitality and inventiveness are as irresistible as ever." —Time

Focus on California Earth Science

Provides many approaches to help students learn science: direct instruction from the teacher, textbooks and supplementary materials for reading, and laboratory investigations and experiments to perform. It also provides for the regular teaching and practice of reading and vocabulary skills students need to use a science textbook successfully.

Earth Science *Prentice Hall*

"Earth science, 14th edition, is a college-level text designed for an introductory course in Earth science. It consists of seven units that emphasize broad and up-to-date coverage of basic topics and principles in geology, oceanography, meteorology, and astronomy. The book is intended to be a meaningful, nontechnical survey for undergraduate students with little background in science. Usually these students are taking an Earth science class to meet a portion of their college or university's general requirements. In addition to being informative and up-to-date, Earth science, 14th edition, strives to meet the need of beginning students for a readable and user-friendly text and a highly usable "tool" for learning basic Earth science principles and concepts"--Provided by publisher.

Earth Science

The Physical Setting : Prentice Hall Brief Review for the New York Regents Exam

The Cosmos

Astronomy in the New Millennium *Cambridge University Press*

An exciting introduction to astronomy, using recent discoveries and stunning photography to inspire non-science majors about the Universe and science.

The Earth System

For courses in Earth Systems Science offered in departments of Geology, Earth Science, Geography and Environmental Science. The first textbook of its kind that addresses the issues of global change from a true Earth systems perspective, *The Earth System* offers a solid emphasis on lessons from Earth's history that may guide decision-making in the future. It is more rigorous and quantitative than traditional Earth science books, while remaining appropriate for non-science majors.

Exploring Earth Science McGraw-Hill Education

Exploring Earth Science by Reynolds/Johnson is an innovative textbook intended for an introductory college geology course, such as Earth Science. This ground-breaking, visually spectacular book was designed from cognitive and educational research on how students think, learn, and study. Nearly all information in the book is built around 2,600 photographs and stunning illustrations, rather than being in long blocks of text that are not articulated with figures. These annotated illustrations help students visualize geologic processes and concepts, and are suited to the way most instructors already teach. To alleviate cognitive load and help students focus on one important geologic process or concept at a time, the book consists entirely of two-page spreads organized into 20 chapters. Each two-page spread is a self-contained block of information about a specific topic, emphasizing geologic concepts, processes, features, and approaches. These spreads help students learn and organize geologic knowledge in a new and exciting way. Inquiry is embedded throughout the book, modeling how scientists investigate problems. The title of each two-page spread and topic heading is a question intended to get readers to think about the topic and become interested and motivated to explore the two-page spread for answers. Each chapter is a learning cycle, which begins with a visually engaging two-page spread about a compelling geologic issue. Each chapter ends with an investigation that challenges students with a problem associated with a virtual place. The world-class media, spectacular presentations, and assessments are all tightly articulated with the textbook. This book is designed to encourage students to observe, interpret, think critically, and engage in authentic inquiry, and is highly acclaimed by reviewers, instructors, and students.
