Introduction to the Regulation of Pesticides

Are pesticides harmful to human health? By their nature, pesticides

are potentially toxic to other organisms, including humans, and need to be used safely and disposed of properly. They are among the leading causes of death by self-poisoning, and this burden is felt disproportionately in low- and middle-income countries.

How does EPA use information on toxicity and health effects of pesticides? Beyond the basic approval process for pesticides, which requires pesticides to meet a standard for safety to humans and the environment, the degree of toxicity determines what precautions must appear on the pesticide label. These include, for example:
