The behavior sample could be elicited by the stimulus of the test itself, or it could be naturally occurring behavior (under observation). Psychological tests and other tools of assessment may differ on a number of vari- ables such as content, format, administration procedures, scoring and interpretation procedures, and technical quality.

Psychological Testing and Assessment

Psychological evaluation is a method to assess an individual's behavior, personality, cognitive abilities, and several other domains. A common reason for a psychological evaluation is to identify psychological factors that may be inhibiting a person's ability to think, behave, or regulate emotion functionally or constructively. It is the mental equivalent of physical examination. Other psychological evaluations seek to better understand the individual's unique characteristics or personality to p
