HVAC Duct Construction Standards - Public.Resource.Org

Turning vanes assist the airflow in making a smoother and more
 gradual change in direction, thus transferring less impact and
 less force to the duct walls. While the turning vane surfaces do
 add a small amount of friction, the amount of energy lost to
 friction from the vanes is very little compared to the energy lost
 in the impact resulting from the airflow taking an abrupt change
 in direction.

Rectangular Singlewall Duct & Fittings | SMC

HVAC turning vanes are curved sheet metal fins placed in air-conditioning duct work at a point where the duct changes direction, typically a 90 degree turn. They are used to promote a more uniform airflow and reduce pressure drop. When airflow changes direction in a duct that lacks turning vanes, the walls of the duct must absorb the sudden impact of the air and redirect it to the correct direction.
