Process safety We want to improve safety through the equipment and systems we use. We do this by applying good practice in their design and implementation and by planning every stage of our operations with safety risks and their mitigation in mind.

Process safety | Sustainability | Home

Process Safety Management is designed to manage the integrity of operating systems and processes handling hazardous substances by applying good design principles, engineering, and operating practices. The OSHA PSM Standard “29 CFR 1910.110” describes elements associated with a management “program” rather than a management “system”.
