cigarette industry has hired some of the world's cleverest designers to make smoking appeal to as many different types of men and women in as many different cultures as possible." Rest in Pieces *Simon and Schuster*

"IN THE LONG RUN, WE'RE ALL DEAD. But for some of the most influential figures in history, death marked the start of a new adventure. The famous deceased have been stolen, burned, sold, pickled, frozen, stuffed, impersonated, and

even filed away in a lawyer's office. Their fingers, teeth, toes, arms, legs, skulls, hearts, lungs, and nether regions have embarked on voyages that crisscross the globe and stretch the imagination.

Counterfeiters tried to steal Lincoln's corpse. Einstein's brain went on a cross-country road trip. And after Lord Horatio Nelson perished at Trafalgar, his sailors submerged him in brandy--which they drank. From Mozart to Hitler, *Rest in Pieces* connects the lives of the famous dead to the hilarious and horrifying adventures of their corpses, and traces the evolution of cultural attitudes toward death"--Back cover.

Death's Summer Coat: What the History of Death and

**Dying Teaches Us
About Life and
Living** *Simon and
Schuster*

In the tradition of *Being Mortal*, Brandy Schillace looks at what we can learn from the incredibly diverse ways in which humans have dealt with mortality in different times and places. Death is something we all confront—it touches our families, our homes, our hearts. And yet we have grown used to denying its existence, treating it as an enemy to be beaten back with medical advances. We are living at a unique point in human history. People are living longer than ever, yet the longer we live, the more taboo and alien our mortality becomes. Yet we, and our loved ones, still remain

mortal. People today still struggle with this fact, as we have done throughout our entire history. What led us to this point? What drove us to sanitize death and make it foreign and unfamiliar? Schillace shows how talking about death, and the rituals associated with it, can help provide answers. It also brings us closer together—conversation and community are just as important for living as for dying. Some of the stories are strikingly unfamiliar; others are far more familiar than you might suppose. But all reveal much about the present—and about ourselves.

Technologies of the Human Corpse *MIT Press*

The relationship of the dead body with technology through history, from nineteenth-century embalming machines to the death-prevention technologies of today.

Death and the dead body have never been more alive in the public imagination—not least because of current debates over modern medical technology that is deployed, it seems, expressly to keep human bodies from dying, blurring the boundary between alive and dead. In this book, John Troyer examines the relationship of the dead body with technology, both material and conceptual: the physical machines, political concepts, and sovereign institutions that humans use to classify, organize, repurpose, and transform the human corpse. Doing so, he asks readers to think about death, dying, and dead bodies in radically different

ways. Troyer explains, for example, how technologies of the nineteenth century including embalming and photography, created our image of a dead body as quasi-atemporal, existing outside biological limits formerly enforced by decomposition. He describes the “Happy Death Movement” of the 1970s; the politics of HIV/AIDS corpse and the productive potential of the dead body; the provocations of the Body Worlds exhibits and their use of preserved dead bodies; the black market in human body parts; and the transformation of historic technologies of the human corpse into “death prevention technologies.” The consequences of total control over death and

the dead body, Troyer argues, are not liberation but the abandonment of Homo sapiens as a concept and a species. In this unique work, Troyer forces us to consider the increasing overlap between politics, dying, and the dead body in both general and specifically personal terms.

Smoke Gets in Your Eyes Gary Drury

Digital Publishing

Smoke Gets In Your Eyes by Susan C. Barto is a group of short stories about life, love, marriage and family. The author delves into a myriad of aspects of love and relationships between spouses, children, and lovers. Some of the stories seem to reflect pain and its subsequent growth as the

protagonist comes out on the other side. One story tells about Emily Dickenson as the author imagines her and what her life and emotions may have been like. Other stories are more prosaic describing the love between husband and wife as they interact with each other and their off-spring. Susan C. Barto has been writing for over fifteen years. Her stories have the ring of truth and express a range of emotions swinging from joy flashes to times of suffering. However, the overriding message seems to show hope as it wins over despair. Hope, the author seems to say, helps people carry on while despair put us down in a valley. All shades of love are covered from

flirtation to a 41 year marriage. Love sets us free and provides balm to fractured spirits. The author seems to believe that love never dies, and expresses this belief. Susan C. Barto has written several earlier books of short stories.

Stand By Me (Sheet Music) *Hal Leonard*
