African Origins *Cruzian Mystic Books*

THE AFRICAN ORIGINS OF CIVILIZATION, MYSTICAL RELIGION AND YOGA PHILOSOPHY 81/2" X 11" Part 1, in one volume First Edition Three volumes in one. Over the past several years I have been asked to put together in one volume the most important evidences showing the correlations and common teachings between Kamitan (Ancient Egyptian) culture and religion and that of India. The questions of the history of Ancient Egypt, and the latest archeological evidences showing civilization and culture in Ancient Egypt and its spread to other countries, has intrigued many scholars as well as mystics over the years. Also, the possibility that Ancient Egyptian Priests and Priestesses migrated to Greece, India and other countries to carry on the traditions of the Ancient Egyptian Mysteries, has been speculated over the years as well. In chapter 1 of the book *Egyptian Yoga The Philosophy of Enlightenment*, 1995, I first introduced the deepest comparison between Ancient Egypt and India that had been brought forth up to that time. Now, in the year 2001 this new book, THE AFRICAN ORIGINS OF CIVILIZATION, MYSTICAL RELIGION AND YOGA PHILOSOPHY, more fully explores the motifs, symbols and philosophical correlations between Ancient Egyptian and Indian mysticism and clearly shows not only that Ancient Egypt and India were connected culturally but also spiritually. How does this knowledge help the spiritual aspirant? This discovery has great importance for the Yogis and mystics who follow the philosophy of Ancient Egypt and the mysticism of India. It means that India has a longer history and heritage than was previously understood. It shows that the mysteries of Ancient Egypt were essentially a yoga tradition which did not die but rather developed into the modern day systems of Yoga technology of India. It further shows that African culture developed Yoga Mysticism earlier than any other civilization in history. All of this expands our understanding of the unity of culture and the deep legacy of Yoga, which stretches into the distant past, beyond the Indus Valley civilization, the earliest known high culture in India as well as the Vedic tradition of Aryan culture. Therefore, Yoga culture and mysticism is the oldest known tradition of spiritual development and Indian mysticism is an extension of the Ancient Egyptian mysticism. By understanding the legacy which Ancient Egypt gave to India the mysticism of India is better understood and by comprehending the heritage of Indian Yoga, which is rooted in Ancient Egypt the Mysticism of Ancient Egypt is also better understood. This expanded understanding allows us to prove the underlying kinship of humanity, through the common symbols, motifs and philosophies which are not disparate and confusing teachings but in reality expressions of the same study of truth through metaphysics and mystical realization of Self.

The arguments and evidence presented time and time again still a make a compelling case for the Nile Valley origins of ancient Egyptian Civilization but Civilization at large.

Introduction to the History of African Civilization: Precolonial Africa *University Press of America*

Introduction to the History of African Civilization explores the major issues dominating African Civilization from the earliest recorded period to the eve of colonial conquest of the continent. C. Magbaily Fyle begins with a discussion of the myths and prejudices underlying most analyses of African issues, and moves into a discussion of the origin of humanity; the similarities between the classical Nile valley civilizations of Egypt, Nubia, Kush, and Axum; and the spread of Islam through African societies. He portrays the systems of precolonial government and society, including the role of women in governance, as well as traditional trade and agricultural patterns. Fyle provides a new perspective on the Islamic Jihads, shifting focus from Sokoto

and Macina to the Senegambia and the Upper Guinea region, and a revised interpretation of the Atlantic slave trade, which includes the importance of African objectors to this process. He also discusses important cultural features such as the traditional African food, architecture, and typical structures of towns.

The Cultural Unity of Negro Africa

The History of Africa *Routledge*

There is a paradox about Africa: it remains a subject that attracts considerable attention yet rarely is there a full appreciation of its complexity. African historiography has typically consisted of writing Africa for Europe—instead of writing Africa for itself, as itself, from its own perspectives. The History of Africa redresses this by letting the perspectives of Africans themselves take center stage. Authoritative and comprehensive, this book provides a wide-ranging history of Africa from earliest prehistory to the present day—using the cultural, social, political, and economic lenses of Africa as instruments to illuminate the ordinary lives of Africans. The result is a fresh survey that includes a wealth of indigenous ideas, African concepts, and traditional outlooks that have escaped the writing of African history in the West. The new edition includes information on the Arab Spring, the rise of FrancAfrica, the presence of the Chinese in Africa, and the birth of South Sudan. The chapters go up to the present day, addressing US President Barack Obama's policies toward Africa. A new companion website provides students and scholars of Africa with access to a wealth of supporting resources for each chapter, including images, video and audio clips, and links to sites for further research. This straightforward, illustrated, and factual text allows the reader to access the major developments, personalities, and events on the African continent. This groundbreaking survey is an indispensable guide to African history.

Black Sumer: the African Origins of Civilisation

The Sumerian Problem HAS BEEN SOLVED! And the solution is African!According to mainstream historians the Sumerians of ancient southern Iraq founded the world's first civilization. They are supposed to have spoken a language which is not genetically related to any known language. This is known as the Sumerian Problem. This book represents the greatest discovery in ancient history for the last hundred years. It demonstrates that Sumerian was genetically related to the Niger-Congo languages of West Africa. Their descendants are the African Diaspora of North and South America and the Caribbean.Many claimed to have solved the Sumerian problem in the past. Hermstein's differs from previous attempts by first showing the reader how to identify genetically related languages through recurrent sound correspondences in basic vocabulary. He then gives examples from acknowledged genetic relationships such as Germanic to show the reader what the evidence should look like. The author also shows what false correspondences look like and how to tell the difference. He also makes use of a number of tests that would determine whether languages are related using probability. This is CLEARLY UNLIKE ANY PREVIOUS ATTEMPT at solving the Sumerian problem.The author reconstructs the epic voyage that took the ancestors of the Sumerians from a homeland in West Africa to Djibouti before making a journey by sea, around Oman and to the

head of the Persian Gulf.The other major discovery in the book is that the Sumerians had a much more advanced system of astronomy than has been supposed. The constellations had geographic associations in the Classical period through myth. Herstein shows how the geographic coordinates of the associated places closely correspond to the celestial coordinates of certain points within the constellations. It is impossible to develop such a system without knowing the earth is round. The text supplying the point of origin for the system of geo-celestial coordinate correspondence is from the Sumerian period.Two amazing discoveries in one book. Both humanity and civilization have an African origin! The ancients knew a lot more than we realized!

African Europeans *Basic Books*

A dazzling history of Africans in Europe, revealing their unacknowledged role in shaping the continent One of the Best History Books of 2021 — Smithsonian Conventional wisdom holds that Africans are only a recent presence in Europe. But in African Europeans, renowned historian Olivette Otele debunks this and uncovers a long history of Europeans of African descent. From the third century, when the Egyptian Saint Maurice became the leader of a Roman legion, all the way up to the present, Otele explores encounters between those defined as "Africans" and those called "Europeans." She gives equal attention to the most prominent figures—like Alessandro de Medici, the first duke of Florence thought to have been born to a free African woman in a Roman village—and the untold stories—like the lives of dual-heritage families in Europe's coastal trading towns. African Europeans is a landmark celebration of this integral, vibrantly complex slice of European history, and will redefine the field for years to come.

Black Genesis *Simon and Schuster*

Presents proof that an advanced black African civilization inhabited the Sahara long before Pharaonic Egypt • Reveals black Africa to be at the genesis of ancient civilization and the human story • Examines extensive studies into the lost civilization of the “Star People” by renowned anthropologists, archaeologists, genetic scientists, and cultural historians as well as the authors’ archaeoastronomy and hieroglyphics research • Deciphers the history behind the mysterious Nabta Playa ceremonial area and its stone calendar circle and megaliths Relegated to the realm of archaeological heresy, despite a wealth of hard scientific evidence, the theory that an advanced civilization of black Africans settled in the Sahara long before Pharaonic Egypt existed has been dismissed and even condemned by conventional Egyptologists, archaeologists, and the Egyptian government. Uncovering compelling new evidence, Egyptologist Robert Bauval and astrophysicist Thomas Brophy present the anthropological, climatological, archaeological, geological, and genetic research supporting this hugely debated theory of the black African origin of Egyptian civilization. Building upon extensive studies from the past four decades and their own archaeoastronomical and hieroglyphic research, the authors show how the early black culture known as the Cattle People not only domesticated cattle but also had a sophisticated grasp of astronomy; created plentiful rock art at Gilf Kebir and Gebel Uwainat; had trade routes to the Mediterranean coast, central Africa, and the Sinai; held spiritual and occult ceremonies; and constructed a stone calendar circle and megaliths at the ceremonial site of Nabta Playa reminiscent of Stonehenge, yet much older. Revealing these “Star People” as the true founders of ancient Egyptian civilization, this book completely rewrites the history of world civilization, placing black Africa back in its rightful place at the center of mankind’s origins.

The Civilizations of Africa *James Currey Publishers*

This book gives serious play to ancient history right across the African continent and it ties these eras into the currents of wider world history. Ancient AFRICAN History A Journey Highlighting Africa's Past *Lulu.com*

A selective journey into Africa's often untold rich history.

Africans *Cambridge University Press*

In a vast and all-embracing study of Africa, from the origins of mankind to the present day, John Iliffe refocuses its history on the peopling of an environmentally hostile continent. Africans have been pioneers struggling against disease and nature, but during the last century their inherited culture has interacted with medical progress to produce the most rapid population growth the world has ever seen. This new edition incorporates genetic and linguistic findings, throwing light on early African history and summarises research that has transformed the study of the Atlantic slave trade. It also examines the consequences of a rapidly growing youthful population, the hopeful but uncertain democratisation and economic recovery of the early twenty-first century, the containment of the AIDS epidemic and the turmoil within Islam that has produced the Arab Spring. Africans: The History of a Continent is thus a single story binding modern men and women to their earliest human ancestors.

Not Out Of Africa

Not Out of Africa has sparked widespread debate over the teaching of revisionist history in schools and colleges. Was Socrates black? Did Aristotle steal his ideas from the library in Alexandria? Do we owe the underlying tenets of our democratic civilizaiton to the Africans? Mary Lefkowitz explains why politically motivated histories of the ancient world are being written and shows how Afrocentrist claims blatantly contradict the historical evidence. Not Out of Africa is an important book that protects and argues for the necessity of historical truths and standards in cultural education.For this new paperback edition, Mary Lefkowitz has written an epilogue in which she responds to her critics and offers topics for further discussion. She has also added supplementary notes, a bibliography with suggestions for further reading, and a glossary of names.

African Athena *OUP Oxford*

The appearance of Martin Bernal's Black Athena: The Afro-Asian Roots of Classical Civilization in 1987 sparked intense debate and controversy in Africa, Europe, and North America. His detailed genealogy of the 'fabrication of Greece' and his claims for the influence of ancient African and Near Eastern cultures on the making of classical Greece, questioned many intellectuals' assumptions about the nature of ancient history. The transportation of enslaved African persons into Europe, the Americas, and the Caribbean, brought African and diasporic African people into contact in significant numbers with the Greek and Latin classics for the first time in modern history. In African Athena, the contributors explore the impact of the modern African disapora from the sixteenth century onwards on Western notions of history and culture, examining the role Bernal's claim has played in European and American understandings of history, and in classical, European, American and Caribbean literary production. African Athena examines the history of intellectuals and literary writers who contested the white, dominant Euro-American constructions of the classical past and its influence on the present. Martin Bernal has written an Afterword to this collection.

Great African Thinkers: Cheikh Anta Diop *Transaction Pub*

This book, the first in a series of work on Africans, whose life and thought have left a major impact on the world, is devoted to the Senegalese physicist, historian and linguist, Dr. Cheikh Anta Diop, who was born in Diourbel, Senegal on December 29, 1923, and died in Dakar on February 7, 1986. No figure in the field of African civilization studies has been more highly regarded in the French and English-speaking world than Diop. In 1966 the First World Festival of Arts and Culture attributed jointly to the late W.E.B. DuBois and Dr. Cheikh Anta Diop its "Award of the Scholar who had

exerted the greatest influence on Negro thought in the 20th century." The book has nearly a hundred illustrations. The Mind of Primitive Man

Stolen Legacy *Simon and Schuster*

For centuries the world has been misled about the original source of the Arts and Sciences; for centuries Socrates, Plato and Aristotle have been falsely idolized as models of intellectual greatness; and for centuries the African continent has been called the Dark Continent, because Europe coveted the honor of transmitting to the world, the Arts and Sciences. It is indeed surprising how, for centuries, the Greeks have been praised by the Western World for intellectual accomplishments which belong without a doubt to the Egyptians or the peoples of North Africa.

Introduction To African Civilizations *National Geographic Books*

Timely, relevant, and illuminating, this essential book by respected cultural historian, teacher, and author John G. Jackson sheds long overdue light on standard Eurocentric and distorting approaches to the history of Africa from early African civilizations to Africa's significance in world history. With brilliantly objective scholarship, respected historian and author John G. Jackson reexamines the outdated, racist, and Westernized history of Africa that is still taught in schools, and presents one infinitely more rich, colorful, varied—and truthful. Challenging the standard dehumanizing and exploitive approaches to African history, from the dawn of prehistory to the resurgent Africa of today—including the portrayal of Africans as “savages” who ultimately benefitted from European enslavement with its “blessings of Christian civilization”—Jackson confronts the parochial historian, devastates the theoretical pretensions of white supremacists, and expands intellectual horizons. Accessible and informed, fascinating and candid, Introduction to African Civilizations is an important historical guide that will enhance antiracist teachings for the general reader and the scholar alike. Introduction by John Henrik Clarke, pioneer of African Studies and author of Christopher Columbus and the African Holocaust Foreword by Runoko Rashidi, historian, activist, and author of Introduction to the Study of African Classical Civilizations

Africa *Black Classic Press*

When the vast majority of mankind in the “Western World” refer to a Slave it is the African-American or his African ancestor is mean. This image has been perpetuated by every branch of “Western” education and religion, both Christian (Roman Catholic and Protestant) and Jewish (all branches of Judaism); and presented in a manner that would suggest an origin dating back to a time of PURITY in ancient Europe amongst the Greeks and Romans; and origins that insinuate the beginning of WORLD CIVILIATION, thus the terms: “Greek philosophy” and “Western Civilization
