What is Enterprise Architecture? A 6 minute explanation.
Software Architecture | Architectural patterns | Architecture vs Design pattern

Enterprise Architect Vs Solution
 A solutions architect focuses on an organization's overall business goals, while an enterprise architect

focuses on enforcing standards and managing items like data diagrams and process flows.

Solutions Architect vs. Enterprise Architect

From this perspective, solution architecture's value to enterprise architecture becomes even more clear.

Where an enterprise architect is concerned with the EA's current state, and the strategy to reach the desired future-state, solutions architects act on that strategic direction. Enterprise Architects vs. Solutions Architects

The Difference Between Enterprise Architecture and ...
 Enterprise architecture can be conceptually divided into different architectural layers

that involve Business Architecture and IT Architecture (Data, Application and Technology Architecture). Solution architecture then takes a problem, and proposes building blocks to solve it. It often reuses other elements made available by the Enterprise Architecture (Enterprise Building Blocks, Enterprise Capabilities, Architectural standards and guidelines)

Enterprise Architects vs Solution Architects vs Domain ...

When comparing all three IT architects, the distinction between an enterprise architect vs. solution architect usually creates the biggest confusion. However, each

architect has a well-defined set of tasks that shouldn't overlap too much with the responsibilities of the other two.

Enterprise Architect vs. Solution Architect vs. Technical ...

Enterprise architects are best known for taking the "50,000-foot view" of a project. A solutions architect zones in on the details. Solution architecture concerns itself with the technical decisions involved in organizing and implementing the solution. It then compares them to business outcomes.

Enterprise vs. Solution vs ... - Architecture Center

As a solutions architect you tend to look at how to apply the right (or

newest, or coolest) technology to a problem. But as an Enterprise Architect you often have to apply the right technology to your team.

Four Key Differences Between a Solution Architect and an ...

Solution Architects: the project managers
Typically, a solution architect is capable of doing everything that a technical architect does, but with a difference. While technical architects display in-depth technical knowledge and have a hands-on approach, they are not expected to provide strategic direction.

The Key Difference between IT Architect Roles: Technical ...
Enterprise and solution

architects don't design buildings, cities or other concrete structures. Their concern is the design of business activity systems in which human and computer actors perform processes to deliver services. They work to extend and improve business roles and processes that create and use data that is or can be digitized.

The business planning context - Enterprise and Solution ...

The difference between solution architect and enterprise architect lies in the scope of responsibilities. While the solution architect's authority is limited by the project they are assigned to, the enterprise architect (as the name suggests)

must take a broader view and check whether the solution strategy chosen by the solution architect is in accord with the company's mission.

Technical Architect vs Solution Architect vs Enterprise ...

There is something that I call "the orthodoxy" (or Good Old-Fashioned Enterprise Architecture—GOFEA; see GOFAL), which says that enterprise architecture is about high level strategic issues, whereas—say—solution architects are more about details and technology. Implicitly, this says "enterprise architecture is about high level and strategy only."

Enterprise Architect vs Solution Architect » Network Interview

The Enterprise Solution Architect becomes a member of the project Solution Architects team and is responsible for the system integration architecture where the solution requires integration between enterprise systems as

well as be responsible for providing future state system architecture guidance to help the project Solution Architect make decisions on which systems to commit to using in the solution.

Enterprise Architect vs Solution Architect - dbj(org);

Enterprise architects and solution architects have very different purposes. They are highly complimentary in that solution architects focus on delivery of solutions, and enterprise architects focus on supporting them by participating on their teams and being involved in any direction and leadership activities.

What does an

enterprise architect do? - CareerExplorer

A solutions architect is responsible for creating a comprehensive architecture for a software solution and providing strategic direction throughout the development process. This person needs to ensure that the new solution fits into the existing enterprise architecture from the technical, business, user, and other perspectives.

What is a Solutions Architect's Role: Complete Guide

Architect is looking at the entire enterprise and is operating at a considerably higher level than the Solution Architect. Additionally,

the Solution Architect has been perceived in more of an IT only role. Finally most Solution Architects are operating at a single business unit level and potentially even a
