Case selection is the rational selection of one or more instances of a phenomenon as the particular subject of research. The reasons for selecting a case or cases vary from interest in the particular case to... Looks like you do not have access to this content.

Case Selection - SAGE Research Methods

John Gerring and Jason Seawright list seven case selection strategies: Typical cases – cases that exemplify a stable cross-case relationship. These cases are representative of the larger population of cases, and the purpose of the study is to look within the case rather than compare it with other cases; Diverse cases – cases that have variation on the relevant X and Y variables. Due to the range of variation on the relevant variables, these cases

are representative of the full population ...

Case study - Wikipedia

Choosing Cases. Once we have a hypothesis to explore or test, and once we have settled on a general research design, then we need to choose specific cases to analyze. Case selection is important whether we are conducting a case study of a single civil war, an experiment involving a few dozen college students, or a statistical comparison of hundreds of elections.

» Case Selection - SSRMC

1. A detailed analysis of a person or group, especially as a model of medical, psychiatric, psychological, or social phenomena. 2. a. A detailed intensive study of a unit, such as a corporation or a corporate division, that stresses factors contributing to its success or failure. b.
