Cellular respiration is the release of energy from organic compounds by metabolic chemical oxidation in the mitochondria in each cell. Cellular respiration involves a number of enzyme mediated reactions. The equation for the oxidation glucose is $C_6H_{12}O_6 + O_2 \rightarrow CO_2 + H_2O + 686$ kilocalories per mole of glucose oxidized. There are three ways cellular respiration could be measured. The consumption of O_2 (how many moles of O_2 are consumed in cellular respiration).

Lab 5 Ap Sample 2 Cell Resp - BIOLOGY JUNCTION

The equation for cellular respiration is: $C_6H_{12}O_6 + 6 O_2 \rightarrow 6 CO_2 + 6 H_2O + 686$ kilocalories of energy/mole of glucose oxidized. Several different measures can be taken from this equation. The consumption of oxygen, which will tell you how many moles of oxygen are consumed during cellular respiration. That is what was measured in this lab.

This process is called cellular respiration which requires nutrient molecules and oxygen. Carbon dioxide and water are products of the series of reactions involved in cellular respiration. $C_6H_{12}O_6 + 6O_2 \rightarrow 6CO_2 + 6H_2O$ There are several methods of indirectly measuring the rate of cellular respiration in organisms. One method involves monitoring changes in temperature; since the process of respiration is exergonic (produces heat).

Introduction. Cellular respiration occurs in most cells of both plants and animals. It takes place in the mitochondria, where energy from nutrients converts ADP to ATP. ATP is used for all cellular activities that require energy. In this laboratory, you will observe evidence for respiration in pea seeds and investigate the effect of temperature on the rate of respiration.

Pearson - The Biology Place

During cellular respiration, two gases are changing in volume. Oxygen gas is being consumed by the respiring cells and carbon dioxide gas is diffusing out of the cells. The respirometer, therefore, has to be able to deal with two simultaneously changing gas volumes. This is accomplished by introducing potassium hydroxide into the device.
