The topics presented in the chapters are organized in an inductive way, starting from the more simplistic simulations up to some complex problems.

Process Analysis and Simulation in Chemical Engineering ...

Process simulation programs are opening up new possibilities in quality assurance. By using process simulation one can determine and visualise process data (e.g., local pressures, temperatures, velocities, etc.) on the whole part. With this knowledge the sensor position can be optimised in order to measure the process data at the critical spots.
