Schrader EZ-Sensor Application Guide | OEM Tire Pressure

...

TPMS stands for tire
pressure monitoring
system. As its name
suggests, a tire
pressure monitoring
system is more than a
single part. In fact,
TPMS involves a valve
and a sensor, and it's
also important to know
that not all TPMS
systems are created
equal. There are two

kinds of TPMS
technology—indirect
and direct.

Schrader TPMS Solutions

A tire pressure monitoring system (TPMS) uses sensors in your tires to tell if one or more of your tires are under-inflated. A low tire pressure light or TPMS light on your dash indicates that your air pressure is more than 25% below the manufacturer's recommended inflation. Continuing to drive with tire pressure that low is very dangerous - it can result in erratic handling, reduced braking capability, and even a vehicle rollover during sudden changes in direction.
