The Financial Reporting Specialization focuses on the role of financial accounting principles and processes in creating and reporting an organization's financial statements. Learners who complete this specialization will be able to (1) use financial accounting principles to create and/or process an organization's financial statements and (2) analyze financial statements to assess an organization's financial position.

Financial Reporting | Coursera

Financial statement reporting and analysis are two different things but of the same background. Financial reporting refers to the document that specifies and releases the financial statement and other information to its stakeholders and other public. This sort of document adds balance sheets, cash flow, net income, and other asset capital details. Whereas financial analysis is the evaluation and study of the different businesses and works to regulate its performance.
