Performing Complete Database

Recovery - Oracle

When you transport an entire database to a different platform, the source platform and the destination platform must use the same endian format. To migrate Oracle Database 12c on-premises tablespaces to an Oracle Database 12c database on a Database service deployment using the RMAN cross-platform transportable backup sets method, you perform these tasks:

RMAN Cross-Platform Transportable Tablespace Backup Sets

RMAN performed the following steps automatically to duplicate the database :

- Allocates automatic auxiliary channel.
- Creates a controlfile for

the clone database.

Performs an incomplete recovery of the clone database using incremental backups and archived redo log files up to the last backed up archived redo log file.
