Instructors can assign modules in their own preferred order. The modules make no assumptions about what students have previously read. Illustrations and key terms are repeated as needed. This modular organization of short, stand-alone text units enhances teacher flexibility. Instead of assigning the entire Sensation and Perception chapter, instructors can assign the module on vision, the module on hearing, and/or the module on the other senses in whatever order they choose. Learning Psychotherapy

A Time-efficient, Research-based, and Outcome-measured Psychotherapy Training Program *W. W. Norton & Company*

The seminar leader is the conduit of basic psychotherapeutic knowledge. The Learning Psychotherapy Seminar Leader's Manual helps instructors introduce beginners to the concepts and processes that define psychotherapy. With the help of the main text and the Learning Psychotherapy Vignettes videotape, seminar leaders show trainees not only the diversity of useful ideas from psychotherapeutic schools but also those variations that fit their own personalities. The program is well-structured but flexible as seminar leaders are encouraged to adapt them to individual training situations-bring in your own cases and encourage trainees to regularly bring in their current clinical problems. Make psychotherapeutic learning come alive by using the modules as the jumping off point!
