Harley Single-Fire Ignition: Dynatek's Dyna 2000 Contributor: Anonymous Harley-Davidson's do not come stock with a single-fire ignition but instead have a dual-fire ignition. A dual-fire

ignition uses a single coil that fires both spark plugs simultaneously. While efficient enough to pass EPA standards this setup ultimately results in a wasted spark. The alternative is a single-fire ignition. A single-fire system will only fire each spark plug on that cylinder's compression stroke.

Dyna S Ignition - YouTube

Dual fire ignition systems fire both spark plugs from a single coil at the same time. The majority of the spark energy goes to the cylinder under compression while a small portion goes to

the cylinder on the exhaust stroke causing a small wasted spark. Single fire ignitions separate the firing pulses, only firing the cylinder under compression.

If you had a single fire tach, you could probably pick one of the coils to attach it to, but attaching only one signal to a dual fire tach would make it show only ½ the actual RPM. Such an adapter can be either bought (about \$20 + shipping) or built (hardware almost free, and a quickie to do).
