How Urban Planning Works | HowStuffWorks

Urban design is the art of designing cities, i.e. architecture taken to the urban scale, the site, the neighborhood or an entire city. It is age old, but as a specialized discipline in the US it was only institutionalized when Harvard started to offer Urban Design as a degree in 1960, after having introduced regional planning as a separate degree as early as 1923.

Urban planning, also known as regional planning, town planning, city planning, or rural planning, is a technical and political process that is focused on the development and design of land use and the built environment, including air, water, and the infrastructure passing into and out of urban areas, such as transportation, communications, and distribution networks.

Urban planning - Wikipedia

Urban design is the process of designing and shaping the physical features of cities, towns, and villages and planning for the provision of municipal services to residents and visitors. Although it deals with issues of a larger scale than architecture, it cannot be understood as a wholly separated field of research and design, since the quality of one depends on the quality of the other.
