Cost Price Analysis

Price analysis looks purely at the unit price from a vendor, while cost analysis incorporates the reasonable cost to the vendor of producing the item to determine the fairness and appropriateness of the price quoted. Depending on the method of procurement and the items in question, cost and price analysis can have very similar or very different results in supply chain decision making.

Your Key Starting Points for Cost and Price Analysis

Cost analysis is used whenever you do not have price competition. A cost analysis is required when: Using the competitive proposal (or "negotiated") method of contracting (see 24 CFR 85.36(d)(3) for a definition), e.g., for acquiring professional, consulting or architect/engineering (A/E) services. Under the competitive proposal method, offerors are required to submit cost proposals that show the elements (e.g., labor, materials, overhead, profit) of their proposed costs or price.

Quick Guide to Cost and Price Analysis | HUD.gov / U.S ...

A cost analysis is required whenever "adequate price competition is lacking and for sole source procurements, including contract modifications or change orders, unless prices can be established on the basis of a catalogue or market price of a commercial product sold in substantial quantities to the general public or on the basis of prices set by law or regulation." Since you are dealing with a change order to the contract, you will be required to perform a cost analysis of the contractor's ...

Cost/Price Analysis | FTA

Informal price analysis must be performed on all procurements over \$3,000. Contracts over \$30,000 require formal, written price analysis. If price analysis and negotiation fail to achieve fair and reasonable prices, cost analysis with documentation of expenses may be required.

Cost & Price Analysis for Government Contracts - Left ...

Cost analysis, a more complex process, is a thorough assessment of the direct and indirect costs leading to the final price of the product or service. Once either of these strategies is applied and expenses are identified, negotiation may be necessary to ensure the best price.

Cost Price Analysis: The Difference Between Cost and Price ...

Cost analysis should be performed in those situations where price analysis does not yield a fair and reasonable price and where cost data are required in accordance with prime contract clauses. Cost analysis techniques are used to break down a contractor's cost or pricing data so as to verify and evaluate each component. Some of the cost elements examined for necessity and reasonableness are

COST AND PRICE ANALYSIS--AN EXPLANATION
