Agricultural Economics and Agribusiness - LSU AgCenter

Agricultural economics is an applied field of economics concerned with the application of economic theory in optimizing the production and distribution of food and fiber. Agricultural economics began as a branch of economics that specifically dealt with land usage, it focused on maximizing the crop yield while maintaining a good soil ecosystem.

Agricultural economics - Wikipedia

Agribusiness is the business of agricultural production which involves the production, protection, sales and marketing of the product to satisfy the customers need. The term is a portmanteau of agriculture and business and was coined in 1957 by John Davis and Ray Goldberg. It includes agrichemicals, breeding, crop production, distribution, farm machinery, processing, and seed supply, as well as marketing and retail sales. All agents of the food and fiber value chain and those

institutions that i

Agribusiness - Wikipedia

According to Snodgrass and Wallace, "Agricultural economics is an applied phase of the social science of economics in which attention is given to all aspects of problems related to agriculture." Prof. Gray treats agricultural economics as a branch of general subject of economics. It is only one of the many branches of applied economics.
