The Shock Of Old Technology

Shock of the Old forces us to reassess the significance of old inventions such as corrugated iron and sewing machines and rethink the relative importance we place on the invention of something new, its application, and its widespread adoption. It challenges the idea that we live in an era of ever increasing change and, interweaving political, economic and cultural history, teaches us to

think critically about technology.

 "The Shock of the Old" is one of the best of these, and it is full of examples of how inventions developed in unexpected places. For example, he points out that in 1895, there were more automobiles running on the streets of Barcelona than there were in New York (or Detroit). But is it all accurate?
