Geometric Constructions: Introduction, Concept, Videos ...

Geometric constructions involve drawing geometric shapes that satisfy certain requirements using a straight-edge and a pair of compasses. The tools to use are a ruler (or straight-edge) and a pair of compasses. A few points to remember when doing the types of geometric constructions covered in these lessons: Do not use a protractor

Geometry: Constructions (solutions, examples, videos)

Geometric constructions, also called Euclidean constructions after the ancient Greek mathematician Euclid, are geometrically correct figures that are drawn using only a compass and a straightedge. In creating a geometric construction, measurements of angles and lines are not taken, and rulers are not used except as straightedges.

What Are Geometric Constructions? (with pictures)

The most-used straightedge and compass constructions include: Constructing the perpendicular bisector from a segment Finding the midpoint of a segment. Drawing a perpendicular line from a point to a line. Bisecting an angle Mirroring a point in a line Constructing a line through a point tangent to a ...

Straightedge and compass construction - Wikipedia

In order to make arithmetic constructions, two segments, one of length x and the other length y , and a unit length of 1 are given. Through basic geometry and algebra, other related lengths can be created. Five arithmetic constructions are $xy+$, $xy-$, xy , xy , and x .

Geometric Constructions - Iowa State University

The word construction in geometry has a very specific meaning: the drawing of geometric items such as lines and circles using only compasses and straightedge or ruler. Very importantly, you are not allowed to measure angles with a protractor, or measure lengths with a ruler. Compasses

Constructions: 1.1 Basic Constructions. When we do constructions in geometry, we will use the traditional approach that uses only. TWO instruments, a compass and a straightedge. Since a compass measures the radius of a. circle, and radii of a circle are congruent, then we can use it to construct congruent segments.

Geometry Constructions Worksheets - Kiddy Math

Constructions using compass and straightedge have a long

history in Euclidean geometry. Their use reflects the basic axioms of this system. However, the stipulation that these be the only tools used in a construction is artificial and only has meaning if one views the process of construction as an application of logic.
