Food Consumption And The Body

If we don't get the right information, our metabolic processes suffer and our health declines. If we get too much food, or food that gives our bodies the wrong instructions, we can become overweight,

undernourished, and at risk for the development of diseases and conditions, such as arthritis, diabetes, and heart disease. In short, what we eat is central to our health.

Description: Food, consumption, and the body in ...

Food consumption is a periodic behavior. It is triggered at various moments of the day by a number of converging factors (time of day, need state, sensory stimulation, social context, etc.). As eating progresses, inhibitory influences of many origins (sensory, gastric, hormonal, neural, as well as cognitive) develop and finally bring the meal to an end.

Food Consumption - an overview | ScienceDirect Topics

Physical boundaries are clearly crucial to food and eating activities as substances pass into, and out of, the body. Uneaten food is 'other', part of the world outside, but its status changes as it is taken in to the mouth, is chewed, swallowed, digested.

At what point does it become part of us?
