Standard Costing. Definition: Standard Costing is a costing method, that is used to compare the standard costs and revenues with the actual results, in order to arrive at the variances along with its causes, to inform the management about the deviations and take corrective measures, for its improvement. The term 'standard cost' can be defined as the expected cost per unit of the products produced during a period, which is based on various factors.

What is Standard Costing? definition, need and process ...

I.C.M.A., London, has defined the term 'Standard Costing' as "the preparation of standard costs of products and services". In the words of W. W. Bigg— "Standard costing is a logical extension of budgetary control in which the principles of comparing 'actual with plan' are applied to the costs of products and services as well as to functions and responsibility centres."
