Definition Of Hypertonic Solution
Hypertonic Solution

Definition. A hypertonic solution contains a higher concentration of solutes compared to another solution. The opposite solution with a lower concentration is known as the hypotonic solution. Scientists must describe cell contents compared to the environment. If a cell is placed in a hypertonic solution, the cell is considered hypotonic. **Hypertonic Solution Overview**

Hypertonic Solution - Definition and Examples | Biology

...
Hypertonic solution: A solution that contains more dissolved particles (such as salt and other electrolytes) than is found in normal cells and blood. For example, hypertonic solutions are used for

soaking wounds.

Definition of Hypertonic solution - MedicineNet

A hypertonic solution is one which has a higher solute concentration than another solution. An example of a hypertonic solution is the interior of a red blood cell compared with the solute concentration of fresh water. When two solutions are in contact, solute or solvent moves until the solutions reach equilibrium and become isotonic with respect to each other.

What Is a Hypertonic Solution? - ThoughtCo

hypertonic solution A solution having a greater osmotic pressure than that of cells or body fluids; a

solution that draws water out of cells, thus inducing plasmolysis.

Hypertonic solution | definition of hypertonic solution by ...

A solution that has higher osmotic pressure (or has more solutes) than another solution to which it is compared.

Hypertonic solution Definition and Examples - Biology ...

A hypertonic solution refers to a solution that has a greater concentration of solute than another solution. In the context of biology, when two aqueous solutions are separated by a cell membrane, if the concentration of solute is greater outside the cell than inside the

membrane, the solution is called hypertonic.

Hypertonic dehydration occurs when there's an imbalance of water and salt in your body. Losing too much water while keeping too much salt in the fluid outside your cells causes hypertonic...

Hypertonic Dehydration: Symptoms, Causes, Treatment ...

A hypertonic solution is when the solute concentration is higher than the concentration inside the cell. In a hypertonic solution, the water moves out of the cell and causes the cell to shrivel. Effects of osmosis in plant cells Plant cells are enclosed by a rigid cell wall.

Osmosis | What Is It?

| A-Level (A2/AS) Biology Revision Notes

Hypertonic Solution – When a solution has more solutes per liter than another solution.

Isotonic – When two solutions have the same concentration, and exchange water and solutes at the same rate.

Osmoregulation – The complex series of cellular mechanisms in organisms which regulates the amount of water and the concentration of each cell's cytosol.

Hypotonic Solution - Definition & Examples | Biology

...

Hypertonic Solutions
Hypertonic solutions are different from isotonic solutions in that cells often lose water. Cells have a

water concentration that is greater inside the cell rather than outside of the cell. Furthermore, the solutes outside of the cell are greater than the solutes inside of the cell.

Understanding Hypotonic, Hypertonic, and Isotonic Solutions

A solution is also described as hypertonic when the other solution being compared with has greater osmotic pressure in a fluid than the other fluid.

Hypertonic may also pertain to a condition or property of a solution that has greater degree of tonicity than the other solution.

Tonicity: hypertonic,

isotonic & hypotonic solutions ...

A hypotonic solution has a low solute concentration than the inside of the cells (solute concentration in the cell is high).

Osmotic forces then cause water from a solution to enter the cells. The cell eventually stretches and bursts in the process becoming lysis. (0 votes)
