Since coding is a simple act of translation, you don't need much to perform it. In most cases, a simple text editor like WordPad would suffice (although an IDE with built-in autofill and debug tools is often helpful). Programmers, on the other hand, need to review documentation and perform analysis besides coding which requires extra tools.

Coding Vs Programming For Beginners: What Is The Difference?

Both "coding" and "programming" are used to refer to the coding and programming of computer programs. Coding means writing code and programming means developing the steps and solving the problem. In that sense, both are highly related. Without programming, there's no coding. Without coding, there's no meaning for programming.
