Sustainable construction takes account of these objectives in a balanced way at all stages of a construction project. Sustainability should be considered when first deciding whether a new building or piece of infrastructure is needed, throughout the specification and design, on the construction site, in operation (including maintenance and refurbishment), and ultimately in deconstruction or demolition.

Sustainable Construction: An Introduction

The introduction of authoritative sustainable policies may at times have a negative impact on the short term profit margins, although with the balance of a longer useful life given to investments. On the whole, however, the environmental debate and the continuing puzzle of underdevelopment have had an impact on the way we think about growth and progress.
