Information Technology in Bio- and Medical Informatics ...

Information Technology is the concept involving the development, maintenance, and use of computer systems, software, and networks for the processing and distribution of data. Often in the context of a business or other enterprise. IT is considered to be a subset of information and communications technology (ICT).

Future Trends of Information Technology (IT) - Witan World

Information technology (IT) is the use of computers to store, retrieve, transmit and manipulate data or information. IT is typically used within the context of business operations as opposed to personal or entertainment technologies. IT is considered to be a subset of information and communications technology (ICT). An information technology system (IT system) is generally an information system ...
