January 13, 2015. Stool consistency and form are significant aspects of a GI assessment, providing valuable information about the patient’s bowel motility. Properly identifying and describing these components can help prevent adverse outcomes and promote patient comfort and well-being. Historically, though, clinicians’ interpretation of stool consistency has been subjective due to lack of appropriate and consistent descriptors.

**Refining stool consistency descriptors can help prevent ...**

The internal and external sphincters form 2 concentric rings which run along the length of the anal canal. The internal anal sphincter (IAS) is made of smooth muscle and we do not have voluntary control of this muscle. It works automatically to keep the anus closed until we are ready to have a bowel movement.
