Oil Gas Reservoir Engineer Jobs, Employment | Indeed.com

Reservoir Engineers are employed by oil and gas companies and are responsible for determining fuel amount and location. Typical job activities listed on a Reservoir Engineer resume include using advanced equipment and computer software, making adjustments during the drilling process, analyzing reservoir viability and investment potential, and updating knowledge of oil price fluctuations.

Reservoir Engineer Resume Examples | JobHero

Reservoir engineering. Reservoir Engineering involves assessing oil and gas deposits. Reservoir engineers firstly estimate the size of a reservoir, then determine how much oil and gas reserves are in the reservoir and finally work out how to maximize the economic return from extracting them. Since it is usually not possible to physically ascertain what's under the ground, a Reservoir Engineer needs to find other ways to establish what is there.

Reservoir Engineers - Collarini

Reservoir engineers estimate how much oil or gas can be recovered from underground deposits, known as reservoirs. They study reservoirs' characteristics and determine which methods will get the most oil or gas out of the reservoirs. They also monitor operations to ensure that optimal levels of these resources are being recovered.
