Stock Solution Preparation

Once you have a stock solution, you can prepare solutions of lower concentration by diluting the concentrated stock solution. To dilute means to add a certain amount of solvent (water) to a certain amount of concentrated stock solution. If you add a certain amount of solvent to a certain amount of concentrated stock solution, you will notice that the amount of solute present in the stock solution is the same amount present in the dilute solution.

How to prepare a solution from stock solution

A stock solution is a commercially prepared solution of known concentration and is often used for this purpose. Diluting a stock solution is

preferred because the alternative method, weighing out tiny amounts of solute, is difficult to carry out with a high degree of accuracy.
