Health Risk Assessment. Scope. The EHC monographs are intended to provide critical reviews on the effect on human health and the environment of physical, chemical and biological agents. As such, they include and review studies that are of direct relevance for the evaluation. However, they do not describe every study that has been carried out.

WHO | Health Risk Assessment

Risk assessments are living documents and should be reviewed at least annually. There are a number of things that may also prompt a review sooner than planned, including: Accidents, ill health and dangerous occurrences (or 'near misses'); Significant changes to personnel or work practices; and; If there is a reason to believe that the current risk assessment is no longer valid.

Health & Safety Risk Assessment | Ellis Whittam

A health risk assessment (HRA) is a health questionnaire, used to provide individuals with an evaluation of their health risks and quality of life. Commonly a HRA incorporates three key elements – an extended questionnaire, a risk calculation or score, and some form of feedback i.e. face-to-face with a health advisor or an automatic online report. The Centers for Disease Control and Prevention define a HRA as: "a systematic approach to collecting information from individuals that ...
