Outliers

The Story of Success *Little, Brown*

From the bestselling author of The Bomber Mafia, learn what sets high achievers apart—from Bill Gates to the Beatles—in this seminal work from "a singular talent" (New York Times Book Review). In this stunning book, Malcolm Gladwell takes us on an intellectual journey through the world of "outliers"—the best and the brightest, the most famous and the most successful. He asks the question: what makes high-achievers different? His answer is that we pay too much attention to what successful people are like, and too little attention to where they are from: that is, their culture, their

family, their generation, and the idiosyncratic experiences of their upbringing. Along the way he explains the secrets of software billionaires, what it takes to be a great soccer player, why Asians are good at math, and what made the Beatles the greatest rock band. Brilliant and entertaining, *Outliers* is a landmark work that will simultaneously delight and illuminate.

David and Goliath

Underdogs, Misfits, and the Art of Battling Giants *Little, Brown*

Explore the power of the underdog in Malcolm Gladwell's dazzling examination of success, motivation, and the role of adversity in shaping our lives, from the bestselling author of *The Bomber Mafia*. Three thousand years ago on a battlefield in ancient Palestine, a shepherd boy felled a mighty warrior with nothing more than a stone and a sling, and ever since then the names of David and Goliath have stood for battles between underdogs and giants. David's victory was improbable and miraculous. He shouldn't have won. Or should he have? In *David and Goliath*, Malcolm Gladwell challenges how we think about obstacles and disadvantages, offering a new interpretation of what it means to be discriminated against, or cope with a disability, or lose a parent, or attend a mediocre school, or suffer from any number of other apparent setbacks. Gladwell begins with the real story of what happened between the giant and the shepherd boy those many years ago. From there, *David and Goliath* examines Northern Ireland's Troubles, the minds of cancer researchers and civil rights leaders, murder and the high costs of revenge, and the dynamics of successful and unsuccessful classrooms—all to demonstrate how much of what is beautiful and important in the world arises from what looks like suffering and adversity. In the tradition of Gladwell's previous bestsellers—*The Tipping Point*, *Blink*, *Outliers* and *What the Dog Saw*—David and Goliath draws upon history, psychology, and powerful storytelling to reshape the way we think of the world around us.

Summary of "Talking to Strangers" by Malcolm Gladwell - Free book by QuickRead.com *QuickRead.com*

Perfect for learning how humans are notoriously bad at judging strangers through the stories of high-profile cases like Sandra Bland and Amanda Knox. Combining academic research in sociology and psychology with journalism, Malcolm Gladwell continuously writes books that attempt to change society's perceptions of social issues. Talking to Strangers is no different and discusses the implications of judging others without truly knowing or understanding one another. The book’s introduction and final chapter discuss the case of Sandra Bland, an African-American woman stopped by a white highway patrolman in 2015 who was later found dead in her cell by apparent suicide. Bland was arrested after a typical traffic stop escalated into a confrontation, and her death “is what happens when a society doesn’t know how to talk to strangers,” according to Gladwell. Throughout the book, Gladwell explores the nuances and intricacies of talking to strangers and shows how even experts trained in judgment and psychology lack the ability to predict how a stranger will behave. Covering high-profile cases like those of Sandra Bland and the Ponzi scheme of Bernie Madoff, *Talking to Strangers* will reveal how little you really know about the people that walk among you.

Talking to Strangers

What We Should Know about the People We Don't Know *Little, Brown*

Malcolm Gladwell, host of the podcast *Revisionist History* and author of the #1 New York Times bestseller *Outliers*, offers a powerful examination of our interactions with strangers and why they often go wrong—now with a new afterword by the author. A Best Book of the Year: The Financial Times, Bloomberg, Chicago Tribune, and Detroit Free Press How did Fidel Castro fool the CIA for a generation? Why did Neville Chamberlain think he could trust Adolf Hitler? Why are campus sexual assaults on the rise? Do television sitcoms teach us something about the way we relate to one another that isn’t true? *Talking to Strangers* is a classically Gladwellian intellectual adventure, a challenging and controversial excursion through history,

psychology, and scandals taken straight from the news. He revisits the deceptions of Bernie Madoff, the trial of Amanda Knox, the suicide of Sylvia Plath, the Jerry Sandusky pedophilia scandal at Penn State University, and the death of Sandra Bland—throwing our understanding of these and other stories into doubt. Something is very wrong, Gladwell argues, with the tools and strategies we use to make sense of people we don’t know. And because we don’t know how to talk to strangers, we are inviting conflict and misunderstanding in ways that have a profound effect on our lives and our world. In his first book since his #1 bestseller *David and Goliath*, Malcolm Gladwell has written a gripping guidebook for troubled times.

Blink

The Power of Thinking Without Thinking *Back Bay Books*

From the #1 bestselling author of *The Bomber Mafia*, the landmark book that has revolutionized the way we understand leadership and decision making. In his breakthrough bestseller *The Tipping Point*, Malcolm Gladwell redefined how we understand the world around us. Now, in *Blink*, he revolutionizes the way we understand the world within. *Blink* is a book about how we think without thinking, about choices that seem to be made in an instant--in the blink of an eye--that actually aren't as simple as they seem. Why are some people brilliant decision makers, while others are consistently inept? Why do some people follow their instincts and win, while others end up stumbling into error? How do our brains really work--in the office, in the classroom, in the kitchen, and in the bedroom? And why are the best decisions often those that are impossible to explain to others? In *Blink* we meet the psychologist who has learned to predict whether a marriage will last, based on a few minutes of observing a couple; the tennis coach who knows when a player will double-fault before the racket even makes contact with the ball; the antiquities experts who recognize a fake at a glance. Here, too, are great failures of "blink": the election of Warren Harding; "New Coke"; and the shooting of Amadou Diallo by police. *Blink* reveals that great decision makers aren't those who process the most information or spend the most time deliberating, but those who have perfected the art of "thin-slicing"--filtering the very few factors that matter from an overwhelming number of variables.

The Bomber Mafia

A Dream, a Temptation, and the Longest Night of the Second World War *Little, Brown*

An exploration of how technology and best intentions collide in the heat of war A New York Times Book Review Editors’ Choice In *The Bomber Mafia*, Malcolm Gladwell weaves together the stories of a Dutch genius and his homemade computer, a band of brothers in central Alabama, a British psychopath, and pyromaniacal chemists at Harvard to examine one of the greatest moral challenges in modern American history. Most military thinkers in the years leading up to World War II saw the airplane as an afterthought. But a small band of idealistic strategists, the “Bomber Mafia,” asked: What if precision bombing could cripple the enemy and make war far less lethal? In contrast, the bombing of Tokyo on the deadliest night of the war was the brainchild of General Curtis LeMay, whose brutal pragmatism and scorched-earth tactics in Japan cost thousands of civilian lives, but may have spared even more by averting a planned US invasion. In *The Bomber Mafia*, Gladwell asks, “Was it worth it?” Things might have gone differently had LeMay’s predecessor, General Haywood Hansell, remained in charge. Hansell believed in precision bombing, but when he and Curtis LeMay squared off for a leadership handover in the jungles of Guam, LeMay emerged victorious, leading to the darkest night of World War II. *The Bomber Mafia* is a riveting tale of persistence, innovation, and the incalculable wages of war.

The Invention of Murder

How the Victorians Revelled in Death and Detection and Created Modern Crime *Macmillan*

"Superb... Flanders's convincing and smart synthesis of the evolution of an official police force, fictional detectives, and real-life cause célèbres will appeal to devotees of true crime and detective fiction alike." -Publishers Weekly, starred review In this fascinating exploration of murder in nineteenth century England, Judith Flanders examines some of the most gripping cases that captivated the Victorians and gave rise to the first detective fiction

Murder in the nineteenth century was rare. But murder as sensation and entertainment became ubiquitous, with cold-blooded killings transformed into novels, broadsides, ballads, opera, and melodrama-even into puppet shows and performing dog-acts. Detective fiction and the new police force developed in parallel, each imitating the other-the founders of Scotland Yard gave rise to Dickens's Inspector Bucket, the first fictional police detective, who in turn influenced Sherlock Holmes and, ultimately, even P.D. James and Patricia Cornwell. In this meticulously researched and engrossing book, Judith Flanders retells the gruesome stories of many different types of murder in Great Britain, both famous and obscure: from Greenacre, who transported his dismembered fiancée around town by omnibus, to Burke and Hare's bodysnatching business in Edinburgh; from the crimes (and myths) of Sweeney Todd and Jack the Ripper, to the tragedy of the murdered Marr family in London's East End. Through these stories of murder-from the brutal to the pathetic-Flanders builds a rich and multi-faceted portrait of Victorian society in Great Britain. With an irresistible cast of swindlers, forgers, and poisoners, the mad, the bad and the utterly dangerous, The Invention of Murder is both a mesmerizing tale of crime and punishment, and history at its most readable.

Just as a single sick person can start an epidemic of the flu, so too can a small but precisely targeted push cause a fashion trend, the popularity of a new product, or a drop in the crime rate. This widely acclaimed bestseller, in which Malcolm Gladwell explores and brilliantly illuminates the tipping point phenomenon, is already changing the way people throughout the world think about selling products and disseminating ideas. “A wonderful page-turner about a fascinating idea that should affect the way every thinking person looks at the world.” —Michael Lewis

Factory Girls

From Village to City in a Changing China *Random House*

An eye-opening and previously untold story, Factory Girls is the first look into the everyday lives of the migrant factory population in China. China has 130 million migrant workers—the largest migration in human history. In Factory Girls, Leslie T. Chang, a former correspondent for the Wall Street Journal in Beijing, tells the story of these workers primarily through the lives of two young women, whom she follows over the course of three years as they attempt to rise from the assembly lines of Dongguan, an industrial city in China’s Pearl River Delta. As she tracks their lives, Chang paints a never-before-seen picture of migrant life—a world where nearly everyone is under thirty; where you can lose your boyfriend and your friends with the loss of a mobile phone; where a few computer or English lessons can catapult you into a completely different social class. Chang takes us inside a sneaker factory so large that it has its own hospital, movie theater, and fire department; to posh karaoke bars that are fronts for prostitution; to makeshift English classes where students shave their heads in monklike devotion and sit day after day in front of machines watching English words flash by; and back to a farming village for the Chinese New Year, revealing the poverty and idleness of rural life that drive young girls to leave home in the first place. Throughout this riveting portrait, Chang also interweaves the story of her own family’s migrations, within China and to the West, providing historical and personal frames of reference for her investigation. A book of global significance that provides new insight into China, Factory Girls demonstrates how the mass movement from rural villages to cities is remaking individual lives and transforming Chinese society, much as immigration to America’s shores remade our own country a century ago.

Do Humankind's Best Days Lie Ahead?

The Munk Debates *House of Anansi*

Progress. It is one of the animating concepts of the modern era. From the Enlightenment onwards, the West has had an enduring belief that through the evolution of institutions, innovations, and ideas, the human condition is improving. This process is supposedly accelerating as new technologies, individual freedoms, and the spread of global norms empower individuals and societies around the world. But is progress inevitable? Its critics argue that human civilization has become different, not better, over the last two and a half centuries. What is seen as a breakthrough or innovation in one period becomes a setback or limitation in another. In short, progress is an ideology not a fact; a way of thinking about the world as opposed to a description of reality. In the seventeenth semi-annual Munk Debates, which was held in Toronto on November 6, 2015, pioneering cognitive scientist Steven Pinker and bestselling author Matt Ridley squared off against noted philosopher Alain de Botton and bestselling author Malcolm Gladwell to debate whether humankind’s best days lie ahead.

Therefore, it is most unfortunate when she crosses paths with Alex O’Riley, a pirate who is no Mr. Darcy. With all the world scrambling after the amulet, Alex and Charlotte join forces to steal it together. If only they could keep their pickpocketing hands to themselves! If Alex’s not careful, he might just steal something else—such as Charlotte’s heart.

Gone Tomorrow *Abrams*

Kluge's brilliant novel tells of George Canaris, a writing professor who is on the verge of forced retirement at a small college in Ohio when he is killed by a hit-and-run driver. Kluge's creation of Canaris as the first faculty member in half a century whose death merits an obituary in the New York Times is right on the money. A writer, a critic, a professor, a campus legend and a national figure, the very embodiment of the liberal arts, the fictional Times obituary said. And a mystery. Canaris, hero and anti-hero, was the author of two well-received novels and a book of essays, all published more than thirty years ago. Taken together, they were the beginnings of an impressive shelf to which, in all his years in Ohio, he added nothing. Compared to Faulkner and Dos Passo at the start of his career, the Times observed, in the end Canaris resembled Harper Lee. With a book listed among the 100 greatest novels of all time, decades separating Canaris from the hefty advance taken on his next book The Beast, which was to be his masterpiece and not a page to show of it, Canaris is a great fictional creation an enigma. Inevitably, speculation grows that the book was a myth, a lie, a joke. Every passing year made skeptics more confident. But never certain. Upon his death, Mark May, a young English professor who barely knew him finds himself named as Canaris's literary executor executor of what is unclear. Thus begins a search through lives and letters that is at once gripping, hilarious and affirming. A true page-turner, P.F. Kluge's Gone Tomorrow, is equal parts Richard Russo and Michael Chabon, and yet entirely unlike anything you've ever read.

You’re Not Broken

Break free from trauma and reclaim your life *Penguin Group Australia*

In one way or another, we all carry trauma. It can manifest as anxiety, shame, low self-esteem, over-eating, under-eating, addiction, depression, confusion, people-pleasing, under-earning, low mood, negative thinking, social anxiety, anger, brain fog and more. Traumas, big or ‘little’, leave us trapped in cycles of dysfunctional behaviours, negative thoughts and difficult feelings. Dr Sarah Woodhouse is a Research Psychologist who specialises in trauma and is passionate about helping people face this word and their past. In You’re Not Broken she teaches you what a trauma is (it’s probably not what you think), and how to recognise when, why and how your past is holding you back. She gently explains the pitfalls of ignoring awkward, upsetting episodes and how true freedom comes from looking back at your past with honesty. Then, sharing the latest research-based techniques and her own personal experience, she guides you towards breaking the trauma loop, reawakening your true self and reclaiming your future.

Soul Full of Coal Dust

A Fight for Breath and Justice in Appalachia *Little, Brown*

In a devastating and urgent work of investigative journalism, Pulitzer Prize winner Chris Hamby uncovers the tragic resurgence of black lung disease in Appalachia, its Big Coal cover-up, and the resilient mining communities who refuse to back down. Decades ago, a grassroots uprising forced Congress to enact long-overdue legislation designed to virtually eradicate black lung disease and provide fair compensation to coal miners stricken with the illness. Today, however, both promises remain unfulfilled. Levels of disease have surged, the old scourge has taken an aggressive new form, and ailing miners and widows have been left behind by a dizzying legal system, denied even modest payments and medical care. In this devastating and urgent work of investigative journalism, Pulitzer Prize winner Chris Hamby traces the unforgettable story of how these trends converge in the lives of two men: Gary Fox, a black lung-stricken West Virginia coal miner determined to raise his family from poverty, and John Cline, an idealistic carpenter and rural medical clinic worker who becomes a lawyer in his fifties. Opposing them are the lawyers at the coal industry’s go-to law firm; well-credentialed doctors who often weigh in for the defense, including a group of radiologists at Johns Hopkins; and Gary’s former employer, Massey Energy, the region’s largest coal company, run by a cantankerous CEO often portrayed in the media as a dark lord of the coalfields. On the line in Gary and John’s longshot legal battle are fundamental principles of fairness and justice, with consequences for miners and their loved ones throughout the nation. Taking readers inside courtrooms, hospitals, homes tucked in Appalachian hollows, and dusty mine tunnels, Hamby exposes how coal companies have not only continually flouted a law meant to protect miners from deadly amounts of dust but also enlisted well-credentialed doctors and lawyers to help systematically deny much-needed benefits to miners. The result is a legal and medical thriller that brilliantly illuminates how a band of laborers — aided by a small group of lawyers, doctors and lay advocates, often working out of their homes or in rural clinics and tiny offices – challenged one of the world's most powerful forces, Big Coal, and won. A deeply troubling yet ultimately triumphant work, Soul Full of Coal Dust is a necessary and timely book about injustice and resistance.

Identical Strangers

A Memoir of Twins Separated and Reunited *Random House*

As seen in the hit documentary Three Identical Strangers • “[A] poignant memoir of twin sisters who were split up as infants, became part of a secret scientific study, then found each other as adults.”—Reader’s Digest (Editors’ Choice) WINNER OF A BOOKS FOR A BETTER LIFE AWARD Elyse Schein had always known she was adopted, but it wasn’t until her mid-thirties while living in Paris that she searched for her biological mother. What she found instead was shocking: She had an identical twin sister. What’s more, after being separated as infants, she and her sister had been, for a time, part of a secret study on separated twins. Paula Bernstein, a married writer and mother living in New York, also knew she was adopted, but had no inclination to find her birth mother. When she answered a call from her adoption agency one spring afternoon, Paula’s life suddenly divided into two starkly different periods: the time before and the time after she learned the truth. As they reunite, taking their tentative first steps from strangers to sisters, Paula and Elyse are left with haunting questions surrounding their origins and their separation. And when they investigate their birth mother’s past, the sisters move closer toward solving the puzzle of their lives. Praise for Identical Strangers “Remarkable . . . powerful . . . [an] extraordinary experience . . . The reader is left to marvel at the reworking of individual identities required by one discovery and then another.”—Boston Sunday Globe “Absorbing.”—Wired “[A] fascinating memoir . . . Weaving studies about twin science into their personal reflections . . . Schein and Bernstein provide an intelligent exploration of how identity intersects with bloodlines. A must-read for anyone interested in what it means to be a family.”—Bust “Identical Strangers has all the heart-stopping drama you’d expect. But it has so much more—the authors’ emotional honesty and clear-eyed insights turn this unique story into a universal one. As you accompany the twins on their search for the truth of their birth, you witness another kind of birth—the germination and flowering of sisterly love.”—Deborah Tannen, #1 New York Times bestselling author of You Just Don’t Understand “A transfixing memoir.”—Publishers Weekly

Nudge

Improving Decisions About Health, Wealth, and Happiness *Penguin*

Now available: Nudge: The Final Edition The original edition of the multimillion-copy New York Times bestseller by the winner of the Nobel Prize in Economics, Richard H. Thaler, and Cass R. Sunstein: a revelatory look at how we make decisions—for fans of Malcolm Gladwell’s Blink, Charles Duhigg’s The Power of Habit, James Clear’s Atomic Habits, and Daniel Kahneman’s Thinking, Fast and Slow Named a Best Book of the Year by The Economist and the Financial Times Every day we make choices—about what to buy or eat, about financial investments or our children’s health and education, even about the causes we champion or the planet itself. Unfortunately, we often choose poorly. Nudge is about how we make these choices and how we can make better ones. Using dozens of eye-opening examples and drawing on decades of behavioral science research, Nobel Prize winner Richard H. Thaler and Harvard Law School professor Cass R. Sunstein show that no choice is ever presented to us in a neutral way, and that we are all susceptible to biases that can lead us to make bad decisions. But by knowing how people think, we can use sensible “choice architecture” to nudge people toward the best decisions for ourselves, our families, and our society, without restricting our freedom of choice.

Backable

The Surprising Truth Behind What Makes People Take a Chance on You *Little, Brown*

A groundbreaking book that boldly claims the key to success is not talent, connections, or ideas, but the ability to persuade people to take a chance on your potential. "The most exceptional people aren't just brilliant...they're backable." —Daniel Pink, #1 New York Times bestselling author of When, Drive and To Sell is Human No one makes it alone. But there’s a reason some people can get investors or bosses to believe in them while others

cannot. And that reason has little to do with experience, pedigree, or a polished business plan. Backable people seem to have a hidden quality that inspires others to take action. We often chalk this up to natural talent or charisma...either you have “it” or you don’t. After getting rejected by every investor he pitched, Suneel Gupta had a burning question: Could “it” be learned? Drawing lessons from hundreds of the world’s biggest thinkers, Gupta discovered how to pitch new ideas in a way that has raised millions of dollars, influenced large-scale change inside massive corporations, and even convinced his eight-year-old daughter to clean her room. Inside Backable are long-held secrets from producers of Oscar-winning films, members of Congress, military leaders, culinary stars, venture capitalists, founders of unicorn-status startups, and executives at iconic companies like Lego, Method, and Pixar. Backable reveals how the key to success is not charisma, connections, or even your résumé, but rather your ability to persuade others to take a chance on you. This original book will show you how.
