Having built one by myself, I can easily see how this unlimited renewable energy source is quickly being adopted by cities worldwide.

Solar Power Basics (A Comprehensive Beginner's Guide)

Solar panels are groups of photovoltaic (PV) cells that turn sunlight into electricity. Solar is a plentiful, renewable source of energy - and solar energy even works well in the grey old UK, because solar panels don't need direct sunlight to function.

Solar panels electricity | How do solar ... - OVO Energy

When solar electricity is generated by your panels, it will first be used by appliances in your home, with any surplus solar energy exported to the grid. Your electricity retailer will pay you a small amount (around 7-20c) for each kWh your installation exports to the grid. It is better to use the solar power generated by your system than export it.
