Artificial insemination has become a popular means of mating, and, with the development of these different techniques, it can be performed easily and with relatively good conception rates and ...

Deciding on the Best Method of Artificial Insemination ...

Transcervical Insemination FAQ Q: What is transcervical insemination (TCI)? A: TCI is a technique in which a rigid endoscope is used to locate the cervix and pass a catheter through it for intrauterine insemination of frozen semen without the need for surgery.

Transcervical Insemination > Canine Repro Program

Cervical anatomy limits the use of transcervical intrauterine artificial insemination (TC AI) in sheep. We have developed an instrument to cope atraumatically with the cervix; although this...

Transcervical artificial insemination in sheep: Effects of ...

Normally ram semen is diluted to at least 1:8 with the chosen extender with final dilution depending on the type of insemination (laparoscopic AI versus cervical AI versus transcervical AI). Doses of semen for the various techniques can be found in Table 86-3.

Artificial Insemination and Embryo Transfer in Sheep ...

Usboko, Y. (1995) A study of transcervical artificial insemination in sheep. MAgSc. thesis, Massey University, Palmerston North, New Zealand. The study describes two trials on artificial insemination in Romney ewes. Trial 1 was conducted to examine the anatomical site in the reproductive tract of the

A study of transcervical artificial insemination in sheep

Although transcervical insemination is routine in the cattle industry, it was thought to be impossible in the bitch so until relatively recently most veterinarians have used surgery to deposit the semen into the uterus. In the early seventies, Fougner et al., developed a transcervical insemination technique for the fox fur industry in Norway [1].

Endoscopic Transcervical Insemination in the Bitch

Artificial insemination (AI) is the keys to the efficient transfer of genetical knowledge from rams to ewes and to ensure proper productive traits of theirs. The efficient insemination of high-quality semen is very important in an artificial insemination of ewe. Artificial insemination is also part of the biotechnological studies.

Mechanical and Pharmacologic Applications of Artificial ...

In order to find a fast and less intrusive artificial insemination (AI) method that could replace laparoscopic insemination, a field comparison of laparoscopic and transcervical techniques was carried out on 200 mature Sarda ewes. After AI, ewes were assigned to teaser and fertile rams for 2 months.

Comparison of laparoscopic and transcervical insemination ...

and subsequent development of the transferred embryos is critically dependent on the intrauterine placement. It is an understatement that the sheep industry would benefit from the increases in reproductive efficiency and genetic gains offered through AI and MOET since the global demand for sheep products is rising, with the demand cur-
