Biopsychosocial Case Formulation For People

The Biopsychosocial Model and Case Formulation (also known as the Biopsychosocial Formulation) in psychiatry is a way of understanding a patient as more than a diagnostic label. Hypotheses are generated about the origins and causes of a patient's symptoms. The most common and clinically practical way to formulate is through the biopsychosocial approach, first described in 1980 by George Engel.

Biopsychosocial Case Formulation For People With Intellectual

The chapter about social formulation starts from a social database of ten categories and grafts on cultural and spiritual assessments. Differential diagnosis should be made by using the three areas—bio, psycho, and social—and sorting presenting symptoms into eight major categories. One then matches these with DSM-IV diagnoses. Risk assessment is then done with another database and more mnemonics.

The Case Formulation in Child and Adolescent Psychiatry

The biopsychosocial model, (BPS for short) is an interdisciplinary model which claims that the health

and well-being of a person depends upon a range of factors: biological factors, psychological factors, and social factors. The model explains that all three factors are equally important in the health and well-being of human beings, and biological factors cannot be held solely and completely responsible for either health issues, or wellness.
