What To Say: And What Not To Say When...

Have you ever tried to communicate important information to someone, only to have them become defensive, or argumentative? This can be a big problem, because often the conversation turns into a debate, with the other person either shutting down or defending the very behavior you want them to change! In "What To Say," psychologist, Dr. Bill Crawford goes way beyond "good communication skills" & uses the latest brain science to show readers what is really happening when others are

being resistant, and why trying to explain things to them rationally or defending your position doesn't work! He then gives specific examples of "what to say" (and what not to say) to ensure that those you are wanting to engage shift from the resistant brain to the receptive brain so that they can truly hear and understand what you are wanting them to know.

What to Say Next *Simon and Schuster*

Using her personal experience living as a professional woman with Autism Spectrum Disorder, Sarah Nannery, together with her husband, Larry, offers this timely communication guide for anyone on the Autism spectrum looking to successfully navigate work, life, and love. When Sarah Nannery got her first job at a small nonprofit, she thought she knew exactly what it would take to advance. But soon she realized that even with hard work and conscientiousness, she was missing key meanings and messages embedded in her colleagues' everyday requests, feedback, and praise. She had long realized her brain operated differently than others, but now she knew for sure: she had Autism Spectrum Disorder (ASD). With help from her neurotypical partner—now husband—Larry, mostly in frantic IM chats, Sarah rose to Director of Development at one of the world's largest nonprofits. Together they have tackled challenges in how Sarah navigates personal and professional relationships, how they navigate marriage and parenthood, all of which are differently challenging for someone with ASD. But she wonders, at times, how life would be different if she'd had to figure it all out herself. So, in *What to Say Next*, she offers advice, empathy, and straightforward strategies from her own tool-kit—not only for others who see the world differently, but for their families, partners and colleagues. In *What to Say Next*, Sarah breaks down everyday situations—the chat in the break room, the last-minute meeting, the unexpected run-in—in granular detail, explaining not only how to understand the goals of others, but also how to frame your own. Larry adds his thoughts from a neurotypical perspective, sharing what was going on in his brain and how he learned to listen and enlighten, while supporting and maintaining Sarah's voice. At a time when more and more people are being diagnosed with ASD—especially women and girls—this book tells important truths about what it takes to make it in a neurotypical world, and still be true to yourself.

What Do You Say? *Penguin*

A guide to effectively communicating with teenagers by the bestselling authors of *The Self-Driven Child* If you're a parent, you've had a moment--maybe many of them--when you've thought, "How did that conversation go so badly?" At some point after the sixth grade, the same kid who asked "why" non-stop at age four suddenly stops talking to you. And the conversations that you wish you could have--ones fueled by your desire to see your kid not just safe and healthy, but passionately engaged--suddenly feel nearly impossible to execute. The good news is that effective communication can be cultivated, learned, and taught. And as you get better at this, so will your kids. William Stixrud, Ph.D., and Ned Johnson have 60 years combined experience talking to kids one-on-one, and the most common question they get when out speaking to parents and educators is: What do you say? While many adults understand the importance and power of the philosophies behind the books that dominate the parenting bestseller list, parents are often left wondering how to put those concepts into action. In *What Do You Say?*, Johnson and Stixrud show how to engage in respectful and effective dialogue, beginning with defining and demonstrating the basic principles of listening and speaking. Then they show new ways to handle specific, thorny topics of the sort that usually end in parent/kid standoffs: delivering constructive feedback to kids; discussing boundaries around technology; explaining sleep and their brains; the anxiety of current events; and family problem-solving. *What Do You Say?* is a manual and map that will immediately transform parents' ability to navigate complex terrain and train their minds and hearts to communicate ever more successfully.

Kind, encouraging, and humorous, Karen Ehman helps us learn the essential practice of using our words more effectively--alleviating heartache and regret, reducing relational tension and conflict, lessening our stress levels, and growing our relationship with God. From Bible times to modern times women have struggled with their words. What to say and how to say it. What not to say. When it is best to remain silent. And what to do when you've said something you wish you could now take back. In this book a woman whose mouth has gotten her into loads of trouble shares the hows (and how-not-tos) of dealing with the tongue. Beyond just a "how not to gossip" book, this book explores what the Bible says about the many ways we are to use our words and the times when we are to remain silent. Karen will cover using our speech to interact with friends, co-workers, family, and strangers as well as in the many places we use our words in private, in public, online, and in prayer. Even the words we say silently to ourselves. She will address unsolicited opinion-slinging, speaking the truth in love, not saying words just to people-please, and dealing with our verbal anger. Christian women struggle with their mouths. Even though we know that Scripture has much to say about how we are--and are not--to use our words, this is still an immense issue, causing heartache and strain not only in family relationships, but also in friendships, work, and church settings. What Do You Say After You Say Hello? *Random House*

As a psychiatrist, Dr. Berne found that each person, in early childhood--under the powerful influence of his parents--writes his own script that will determine the general course of his life. That script dictates what kind of person he will marry, how many children he will have, even what kind of bed he will die in. Most of all, it determines whether he will be a winner or a loser, a spendthrift or a

skinflint, a tower of strength or a doomed alcoholic. Some people, says Berne, have scripts that call for them to fail in their professions, or to be repeatedly disappointed in love, or to be chronic invalids. Here, he demonstrates how each life script gets written, how it works, and how each of us can break free of it to help us attain real autonomy and true fulfillment.
