The majority of the time, architects work in an office. There, they meet with clients, draft plans, work on cost estimates, file permit applications with municipal building departments, and help clients set up agreements with contractors. Architects also visit construction sites to check the progress of projects and make sure contractors are building them according to their plans.

Paul Marvin Rudolph (October 23, 1918 – August 8, 1997) was an American architect and the chair of Yale University's Department of Architecture for six years, known for his use of concrete and highly complex floor plans. His most famous work is the Yale Art and Architecture Building (A&A Building), a spatially complex brutalist concrete structure.

Paul Rudolph (architect) - Wikipedia

The facets of an architect's role are as varied and fascinating as their work; these are professionals who lead the process of creating functional spaces, from concept and design to a full realization of those designs. Architecture is an art that works hand-in-hand with science to design places where people can live, eat, work and play.
