FEELKES 4.0: Beginning of erect growth, leaf sheaths lengthen. Most tillers have been formed by this stage, and the secondary root system is developing.

Winter wheat with a prostrate vegetative growth habit begins to grow erect. Leaf sheaths thicken. The growing point is still below the soil. Continue scouting for insects and weeds.

The speed of growth will depend on the environment with dull, cool days giving slow growth. In spring wheat's this phase will be rapid as the days are bright and temperatures increasing. Construction. The construction phase starts from the first node being detectable through to flowering. This is a critical growth period as yield delivering leaves, deep roots,

fertile florets and stem reserves form.

Wheat growth and development | Yara UK

Central to the AHDB Wheat growth guide is a common set of UK crop benchmarks. Each benchmark is a reference point against which a crop's performance can be compared. The benchmarks are based on observations of high-yielding feed wheat with a slow rate of development, across several seasons at UK sites.

~ ~ - Texas A&M AgriLife

Organ differentiation defines the various stages of wheat development.

Physiologically, the following stages are usually distinguished: germination, emergence, tillering, floral initiation or double ridge, terminal spikelet, first node or beginning of stem elongation, boot, spike emergence, anthesis and maturity.

Wheat growth and physiology - E. Acevedo, P. Silva, H. Silva

The key growth stages – crop emergence (GS10), the start of stem extension (GS31), flowering (GS61) and the end of grain filling (GS87) – separate the key

development phases: 'foundation', 'construction' and 'production', as explained in Figure 7. The duration of each phase is governed by:

Wheat growth guide - Microsoft

The plant growth stage is determined by main stem and number of tillers per plant e.g. GS22 is main stem plus 2 tillers up to GS29 main stem plus 9 or more tillers. In Australian cereal crops plants rarely reach GS29 before the main stem starts to stem elongate (GS30).
